FROM CEO'S DESK

Commitment and Continuity

Honouring a Legacy of Leadership

It is with a profound sense of responsibility that I as CEO of Irrigation Products International Pvt Ltd wish to convey our heartfelt gratitude to each and every Individual in our Indian Golf Industry who stood with us, while We continue to mourn the recent passing of our Managing Director, Late Shri Ravi Garyali. He was a visionary leader and completely dedicated his life to Indian Golf Industry, built the foundation upon which we stand today. Late Shri Ravi Garyali was more than a leader, he was a mentor and a friend to many in this industry.

Our Unwavering Commitment to You

While we IPI Team navigate this period of transition, our primary focus remains the same, delivering the exceptional service and innovative solutions you expect from us. My immediate priority is ensuring that our operations continue without disruption. We have a robust succession plan in place that ensures our core values and strategic goals remain unchanged. Our Management committee headed by CEO consisting of COO, GM & CFO remains united in our purpose to serve you with the same excellence you have come to expect.

Strength and Stability for Future

I have been associated with IPI Pvt Ltd and Indian Golf industry for more than 16 years now, working closely with Late Shri Ravi Garyali to shape our current trajectory. Our team is more united than ever, and we are committed to:

- **Operational Excellence:** Maintaining the highest standards set by our Team in Association our principal Toro, providing world class products with latest Technology and continue the Industry's best After Market service support to our Golf Industry.
- **Strategic Growth** Advancing the long-term projects and partnerships already in motion.
- **Transparent Communication** Keeping you informed as we evolve and grow together.

Celebrating Recent Success

I am proud to share that, even during this difficult transition, our team has achieved the best run in new sales of Turf maintenance Equipments and Golf Carts to leading Golf courses in India. The great Support and Trust our clients have on us makes us the most preferred Irrigation system supply and installation company and also for the construction / renovaton of golf courses. We also added our support to the golf industry by providing Rental services of high value Equipments which turned out to be great success for us and at the same time much needed relief for our customers who were looking for such support due to their budget constraints. This achievement is a testament to the resilient foundation laid by Late Shri Ravi Garyali and the unwavering support of our shareholders **Mr. Kanwal Misri, Mr. Pradip Sadrangani** and **Mr. Sameer Garyali, Mr. Kabeer Garyali**, the two sons of Late Shri Ravi Garyali, of course with our dedicated award-winning world-class service team of irrigation and Turf maintenance Equipments specialists.

A Partnership for the Future

We value the trust you have placed in IPI Pvt Ltd over the years. I look forward to connecting with many of you personally in the coming weeks to listen to your feedback and discuss how we can continue to support your success.

Thank you for your continued partnership and for the kind messages of support during this difficult time. Your trust is our most valued asset. As we look ahead, we are more committed than ever to delivering the world class products and Services. We are not just maintaining our momentum; we are accelerating it.

Best Regards

Siva Kumar
CEO, IPI Pvt Ltd

FROM THE EDITOR'S NOTES

Dear Valued Client and Friend of IPI,

It is with a full heart - one that holds both profound gratitude and deep, abiding grief - that I welcome you to this very special edition of the IPI Golf Magazine. As you turn these pages, you will find a glimpse of everything 2025 brought us: the milestones, the partnerships, the tournaments, the challenges and the moments on the fairway that remind us, again and again, why we love this game and this extraordinary community.

But 2025 also asked more of us than we ever anticipated. And so, before I speak of the year ahead, I must first speak of the man who made all of this possible.

In Loving Memory

In 2025, we lost our beloved Managing Director, **Ravi Garyali** - a man whose vision built IPI from the ground up, whose integrity set the standard for everything we do, and whose warmth made every person in this organisation - and far beyond it - feel genuinely seen and valued.

Because Ravi believed, above all else, in people. He believed that every role within a team deserves genuine respect - that no contribution is too small, no voice too quiet to matter. That was not a policy for him; it was how he lived. And it is the foundation upon which IPI will continue to stand. There for you, always since 1993.

About this magazine

This magazine, however, is equally the story of a remarkable woman without whom the IPI Golf Magazine - and indeed, the very first IPI Newsletter - would quite simply not exist.

Dr. CK Gariyali - beloved sister of Ravi, and one of the most extraordinary contributors - without whose support IPI would not have been what it is today - has been the editorial heart and soul of this publication from its inception. It was she who conceived and gave life to the very first IPI Newsletter, in January 2009, planting the seed from which this magazine grew season by season. Through every edition, every challenge - and every triumph - she brought her intellect, her dedication and her grace to these pages. Her contribution has never been limited to words alone - she has supported IPI in every respect, in every season, with the fullness of who she is.

It is no coincidence that Dr. CK Gariyali has been our **Guest of Honour** at every Awards Reception hosted by **TORO** - our Principal who we are immensely proud to represent across the Southern and Western Indian Subcontinent. That honour was never ceremonial. It was earned, and it was deserved.

The passage of editorial responsibility from her hands to mine is something I do not take lightly - that's why I took long time to implement - it is a privilege. I will spend every edition honouring and cherishing. I hope to carry forward the standards she set with the same love for this work that she has always so beautifully shown.

A New Beginning

As we step into 2026, as you go through the pages of this "year at a glimpse" you will know that the IPI team is **united, more than ever**. We are grieving, yes - but we are not broken. We carry Ravi's ethics, his values, and his unwavering commitment to excellence forward, together - with the same reciprocal respect for one another that he always insisted upon. That unity is his greatest gift to this organisation, and we intend to honour it in everything we do. Through the guidance of our Chairman, his greatest Friend, **Mr. Kanwal Misri**, and along with Ravi's sons, **Sameer and Kabir Garyali** and with **Mr. Pardeep Sadrangani** - the other shareholder of IPI, we all are here to serve our Clients, our Partners, our Friends, as usual, the IPI Way...

To each of you thank you for your continued trust in IPI. Your loyalty through this chapter has meant more than we can ever express. We do not take it lightly.

With warmth, gratitude and deep respect,

Vita Garyali

A VISIONARY LEADER

Ravi Garyali

A Life of Integrity and Connection: Remembering a Pioneer in the Golf Industry

The Indian golf community lost a towering figure on **5th December 2025** with the passing of **Mr. Ravi Garyali**, a leader whose legacy was built not only on achievement, but on people, purpose, and enduring relationships.

Ravi's professional journey was defined by a rare combination of vision and humility. After graduating with First-Class Honours in Agricultural Economics, he spent two decades in international finance before returning to India in the early 1990s. In 1993 he co-founded IPI with Mr. Ravinder Misri, laying the foundation for what would become one of India's most respected organisations in irrigation and turf management. Under his guidance, IPI grew into a team of more than 300 professionals, recognised repeatedly for excellence in service, innovation and partnership.

But Ravi's influence extended far beyond corporate success.

As Treasurer and active Board Member of the Golf Industry Association (GIA), he played a pivotal role in shaping industry standards and in advancing knowledge-sharing initiatives that strengthened the profession across India.

The December 2025 edition of GIA Insights pays tribute to Ravi's lifelong dedication to the sport and the people who sustain it. The newsletter highlights not only his professional accomplishments - including driving sustainable irrigation practices and raising the bar for greenkeeping education - but also the deep human connections he forged throughout the golf fraternity.

Colleagues and friends remember Ravi as a mentor and a connector during the memorial organized by the family on 13th December 2025.

A Legacy Celebrated

The memorial on **13th December** brought together Clients, Colleagues, friends and family, who shared stories of Ravi's warmth, guidance and generosity. Among those remembering him were his wife Vita Garyali, his sons Sameer and Kabir Garyali, his sister Dr. CK Garyali, former IAS, and the entire IPI Team, reflecting the love and inspiration he fostered both at home and at work.

His partner, **Mr. Kanwal Misri**, rushed from the UK on 5th December and was with Ravi during his last moments, and also witnessed firsthand the deep connection and trust Ravi had nurtured over his lifetime.

Friends, family and the golf fraternity paying tribute to Ravi Garyali's enduring legacy.

Overcome with emotion, Kanwal Misri remarked:
"Ravi's greatest legacy was not just the company he built, but the people he inspired along the way."

The gathering captured the profound impact Ravi had on everyone around him - personally and professionally - showing that his legacy extends far beyond business achievements to the lives he touched and the relationships he nurtured. Ravi was special: he was someone who listened with respect, encouraged with authenticity and opened doors for others to grow. His passion for education and empowerment was especially evident in his support for the GIA Green Section, where he championed the professional development of greenkeepers - positioning them as vital stewards of the course and essential contributors to the industry's future.

Beyond golf, Ravi's spirit of service extended into charitable work, including efforts to expand access to education for underserved communities.

Ravi believed deeply that golf was not merely a game, but a platform for connection - where shared purpose and collaboration could elevate both the individual and the collective. His legacy lives on not only in the institutions he helped build, but in the values he embodied: integrity, curiosity and above all, genuine care for people.

As the industry moves forward, the lessons of his life - rooted in character as much as accomplishment - will continue to inspire the next generation of leaders, professionals and stewards of the game.

On 22nd December 2025, GCSM&MAI dedicated a touching tribute at the Royal Calcutta Golf Club, honouring his lifelong contributions to golf and the broader community.

Hony Secretary General, GCSM&MAI, honoured him stating ***"He leaves behind a company, an industry and a community shaped by his values."***

A Life of Vision, Integrity and Connection

Ravi Garyali believed that true leadership was measured not just by accomplishments, but by the positive impact on others. He embodied vision, integrity and connection, and his legacy continues to inspire the IPI family, the golf fraternity, and countless others who had the privilege of knowing him.

"A life lived with vision, integrity and heart - a legacy that will inspire generations to come." Said Anil Seolekar, President of GIA and owner of Oxford Golf Resort.

WHAT'S SPECIAL?

TORO.

Back-to-Back Excellence: IPI Honoured with the TORO Partners in Excellence Award

Achieving excellence once is an achievement. Sustaining it year after year is a statement. At the recent TORO Global event, IPI was once again honoured with the **TORO Partners in Excellence Award**, marking a back-to-back recognition that reinforces our long-standing commitment to quality, performance and partnership in the golf industry.

The award was presented during the TORO Global event, placing IPI among a select group of top-performing distributors worldwide. With approximately **150 TORO distributors operating in more than 90 countries outside the USA**, this recognition represents the highest level of achievement within TORO's global partner network. Each year, distributors compete against rigorous performance benchmarks, making back-to-back recognition a particularly meaningful accomplishment.

Toro Partners in Excellence Award is a prestigious distinction that underscores our continued commitment to exceptional customer service, strong sales performance, comprehensive after-sales support, and marketing excellence across both **machinery and irrigation solutions**.

Beyond performance metrics, the award reflects a shared philosophy between IPI and TORO - one grounded in technical expertise, reliability, and a deep understanding of the evolving needs of modern golf courses. From delivering advanced turf

solutions to supporting superintendents with consistent service and innovation, IPI continues to set benchmarks in golf course excellence.

Being recognised on a global stage is both an honour and a responsibility - one that motivates us to keep raising standards, together with TORO and our valued partners across the industry.

AntonySamy with the IPI family, celebrating 30 years of dedication and leadership.

30 Years of Dedication: Celebrating Antony Samy - A Milestone Worth Celebrating

This year, IPI proudly honours **Antony Samy**, our General Manager, as he completes 30 remarkable years of dedicated service to the organization. Over three decades, his commitment, leadership, and institutional wisdom have been instrumental not only in driving IPI's growth, but also in shaping the values, culture, and professional ethos that define the company today.

Reflecting on Antony's contribution, **Chairman Mr. Kanwal Misri** shared:

"Antony Samy's journey with IPI is a testament to loyalty, integrity, and quiet leadership. His consistency and sense of

responsibility have provided the organization with stability and strength through changing times."

Echoing this sentiment, **CEO Mr. Siva Kumar** noted:

"More than a General Manager, Antony has been a mentor, a guiding light, and made the strong foundation for IPI. His leadership has inspired generations within the organization."

Adding a personal perspective, **Mr. Rajeev Gupta, Branch Manager – Noida**, who has worked alongside Antony for over 20 years, remarked:

Antony guiding the next generation of leaders at IPI

“Working with Antony has been a privilege. His ability to lead with humility, support teams across regions, and remain deeply committed to IPI’s values has made a lasting impact on all of us.”

Leadership Beyond Titles

AntonySamy’s approach to leadership blends professionalism with humility. He leads with abnegation - the beautiful spirit of selfless dedication - always placing the team before himself. Through every challenge and every success, he has inspired those around him with his integrity, compassion and insight.

His influence extends far beyond organizational goals. Antony has mentored countless colleagues, guided teams through complex projects and helped foster a culture where collaboration, trust and respect thrive.

“30 years is more than a number - it’s a legacy of impact, mentorship and unwavering commitment.” says **RangaBabu**, the COO of IPI.

A Legacy of Dedication

Over three decades, Antony has helped make IPI not just a workplace, but a home. Every achievement, every milestone and every life he has touched reflects the depth of his commitment. His leadership has been both steady and inspiring, ensuring that IPI remains a company built on values as much as results.

“Your wisdom, compassion and leadership have shaped not just our success, but who we are as a family.” quoted **Vita Garyali**.

Thank You, AntonySamy

From all of us at IPI, we extend our heartfelt gratitude to Antony for **30 years of service, dedication, and inspiration**. His legacy is reflected in the people he has guided, the teams he has built, and the culture he has nurtured. His influence will continue to inspire generations to come.

CIDCO OPEN 2025

16th to 19th December 2025

At Kharghar Golf Course, Navi Mumbai

CIDCO Open 2025 Tees Off at Kharghar Valley Golf Course

Kharghar Valley Golf Course (KVGC) took centre stage on the national golfing calendar as it hosted the **CIDCO Open 2025**, presented by **Larsen & Toubro**, from 16th to 18th December 2025. Marking its debut as a newly added venue on the **PGTI Tour**, KVGC's inclusion reflected its rapid transformation into a tournament-ready championship facility.

The tournament concluded with a **brilliant victory by Veer Ahlawat**, whose consistent performance and skill secured him the title, cementing KVGC's position as a tournament-ready championship venue.

Recently renovated into a **full championship 18-hole golf course**, KVGC now offers a layout that challenges

professionals while remaining true to its natural terrain. Strategic hole design, improved playability, and upgraded course infrastructure have positioned it as a worthy test for India's leading professional golfers.

The successful hosting of a PGTI Tour event is a significant milestone for KVGC and a testament to the collaborative effort behind its development and upkeep. The course is **proudly maintained by IPI**, whose agronomy expertise, equipment support, and consistent maintenance standards have played a key role in preparing the venue for top-tier professional competition.

IPI extends its sincere appreciation to **CIDCO** for its continued trust and support in promoting golf and sporting excellence at Kharghar Valley Golf Course. The CIDCO Open 2025 not only highlights KVGC's evolution but also reinforces its growing stature within India's professional golf ecosystem.

As the tournament tees off, KVGC stands ready - championship-calibre, professionally prepared, and poised to deliver an exceptional stage for the PGTI Tour.

HIGHLIGHTS

NEW TURF EQUIPMENT AT INDIA'S TOP GOLF COURSES

Prestige Golfshire Club: New TORO Fleet

For golf enthusiasts and professionals alike, the **Prestige Golfshire Club** represents the pinnacle of the game in India. Spread across **275 acres** in India's Silicon Valley, Bangalore, this premier golf destination is owned by the **Prestige Group** and managed on behalf of the owners by the world's largest golf management company, **Troon Golf**. Recognized as one of Asia's most exclusive golf destinations and widely regarded as **the best golf course in India**, Prestige Golfshire Club demands nothing short of championship-level turf conditions.

New Toro Fleet Commissioned by IPI

To meet these standards, **complete TORO turf fleet** was **commissioned by IPI team** with high precision and seamless handing over of the fleet was done by **IPI Team** along with **Mr. Ravi Garyali to Ben McLean**. Each machine was configured to maintain tournament-grade conditions across the entire course.

"Our new Toro equipment fleet is a major step forward for the operation, increasing efficiency and supporting our team in continuing to deliver high-quality playing conditions," says Ben McLean, Golf Course Superintendent at the Troon-managed Prestige Golfshire Club.

Commissioning the TORO championship fleet at Prestige Golfshire Club.

Beyond supplying equipment, **IPI provides comprehensive support**, including training, technical assistance, and ongoing consultancy, ensuring that the Prestige Golfshire team can maximize every feature of their TORO fleet. This turnkey approach reflects IPI's commitment not just to machinery, but to long-term course performance and operational excellence.

"This project reflects what IPI stands for - bringing world-class solutions, service and performance to India's top golf courses."

Delivering and commissioning the complete TORO fleet at Prestige Golfshire is more than a commercial milestone - it is a testament to IPI's expertise in **elevating India's golf industry to global standards**. For one of Asia's most exclusive golf destinations, IPI has supported the course to maintain championship-ready conditions with efficiency, consistency and precision, reinforcing its position as the country's leading golf solutions partner.

With the TORO championship fleet now fully deployed, Prestige Golfshire Club and IPI together showcase what is possible when innovation, expertise and world-class machinery come together - delivering an unrivalled golfing experience in India's premier golf destination.

Prestige Golfshire Club, powered by IPI's TORO championship fleet.

India's Premier Golf Destination

Declan McCollam, General Manager of Prestige Golfshire Club – Troon Golf, shared:

"For many years Prestige Golfshire has been relying on the reliability of the Toro range of turf care machinery. Our

Course Superintendent Ben Mclean is very meticulous in the efficiency of the fleet and the training of our team to maximize the utilization of the machinery. On the IPI front, from commissioning to ongoing support, their expertise and responsiveness allows us to maintain championship-level conditions every day. The IPI team's assistance truly sets a benchmark in golf course management"

Prestige Golfshire Club and IPI together showcase what is possible when innovation, expertise and world-class machinery come together.

The TORO fleet delivering championship-grade conditions across the course.

Setting the Benchmark

With the fleet fully operational, Prestige Golfshire Club demonstrates **world-class golf management**, powered by **IPI's expertise, innovation, and commitment**. This partnership reinforces IPI as India's leading solutions provider for elite golf courses.

"This project reflects committed partnership among Toro-Troon-Prestige-IPI, to deliver international standard golf course with best playable conditions." Said **Siva Kumar, CEO** at IPI.

Training and technical support from IPI ensures optimal fleet performance.

TORO's Latest Innovations at HGA

How new TORO equipment is enhancing precision and efficiency in golf course maintenance.

Hyderabad Golf Club, Operated by Hyderabad Golf Association since 1992 to promote the golf in the state of Telengana, is where history and high-performance golf converge. Set across 212 acres in the shadow of the iconic Golconda Fort, the course is a regular host of PGTI Tour events and is steadily progressing toward international tournament standards through the Richardson | Danner renovation programme.

Delivering championship conditions in such a demanding and historic environment requires technology that performs without compromise. That is why Hyderabad Golf Club relies on TORO turf equipment, powered in India by Irrigation Products International Pvt Ltd (IPI).

The latest addition to the club's fleet, the Groundsmaster® 3500-D, brings unmatched productivity and precision to fairway and large-area mowing. With superior contour

following and consistent cut quality, it enables maintenance teams to achieve tournament-ready presentation efficiently and reliably. Supporting this is the ProCore® 648, a proven aeration solution that strengthens turf health, improves drainage and enhances playability during high-traffic and tournament periods.

Together, TORO equipment and IPI's aftersales expertise ensure reliability, performance and long-term value - allowing Hyderabad Golf Club to meet modern championship demands while preserving the character of one of India's most iconic golf venues.

IPI – TORO. Trusted by professionals. Proven on championship courses.

A Day of Learning, Innovation and Collaboration - Ventrac at KGA

IPI hosted an immersive **Ventrac** one of TORO's innovative turf solutions brands, **Demo and Training Event** at the Karnataka Golf Association (KGA), Bengaluru, on 26 June 2025. The programme brought together turf professionals from leading golf courses across the country for a hands-on experience with Ventrac's innovative, multi-functional equipment, a brand within the TORO portfolio.

Experience Ventrac in Action

Renowned globally for its multi-functional capabilities and exceptional performance on challenging terrain, Ventrac equipment – part of TORO - was showcased using a variety of attachments, from slope mowing and aeration to debris management. Participants observed live demonstrations led by **Mr. Eric Criswell Smucker**, Ventrac Representative, alongside IPI's expert technical team.

"Ventrac's versatility and precision make it a game-changer for modern turf management," noted one participant during the live session.

Attendees gained practical insights into machine operation, attachment versatility, and maintenance practices, empowering them to integrate these solutions seamlessly into their own golf course operations.

Learning, Collaboration, Innovation

The event fostered interactive discussions, allowing turf managers to explore real-world applications and address specific maintenance challenges. Beyond hands-on training, participants left with a deeper appreciation for:

- Ventrac's operational efficiency and precision
- Flexibility across diverse turf environments
- IPI's technical expertise and ongoing support

Driving Excellence Together

Through initiatives such as the highly innovative workshop hosted at KGA, **Ventrac - part of the TORO portfolio** - together with IPI continues to set new benchmarks for innovation, knowledge sharing, and operational excellence in golf course maintenance. The KGA workshop stands out as a reference point not only in India but across the Asian continent, reinforcing industry best practices and forward-thinking turf management standards.

Precision in Every Pass: TORO GR3250-D at The Poona Club Golf Course (PCGC)

Set over 95 acres of meticulously maintained fairways and roughs, The Poona Club Ltd. is acknowledged as one of India's top five courses, admired by professional golfers, putters, and caddies alike. Its 18-hole course, dotted with majestic banyan and flowering trees, features water bodies and fast, true greens, making it both beautiful and challenging, the only 18-hole course located within the city.

Maintaining such pedigree grounds demands equipment that delivers consistency, efficiency, and precision. The TORO GR3250-D rises to the challenge, ensuring uniform cuts across demanding roughs while supporting high productivity and reliable performance.

Designed to handle challenging turf and uneven terrain, the GR3250-D ensures uniform, clean cuts across extensive rough areas, allowing maintenance teams to manage large sections efficiently without compromising quality. Its advanced drive and cutting systems, combined with operator-friendly controls, make it a trusted choice for daily maintenance as well as tournament preparation.

For Poona Golf Club, the GR3250-D is more than a mower - it is a precision tool that enhances playability, supports agronomic goals, and delivers dependable performance, even under the most demanding conditions. Backed by IPI's technical expertise and service support, the TORO GR3250-D continues to set new standards for rough maintenance across India's leading golf courses.

IPI TORO – Delivering Excellence, One Pass at a Time.

Backed by IPI's technical expertise and service support, the GR3250-D helps The Poona Club maintain championship-quality greens every day, reinforcing its status as one of India's premier golfing destinations.

Bangalore Golf Club Strengthens Course Maintenance with TORO

Bangalore Golf Club (BGC), one of India's most prestigious golf course, has further strengthened its course maintenance capabilities with the recent commissioning of the TORO Groundsmaster® 3500-D 3-wheel counter-rotary mower, supplied by IPI.

Engineered for precision and productivity, the Groundsmaster® 3500-D delivers an exceptional quality of cut across fairways, tees, and surrounds. Its counter-rotary deck technology ensures effective clipping dispersal and a clean, professional finish, while excellent manoeuvrability and proven reliability support BGC's exacting maintenance standards.

With this latest addition, Bangalore Golf Club reinforces its commitment to world-class turf care, backed by trusted TORO technology and IPI's ongoing technical and service support.

Optimising Turf Recovery and Playability at Karnataka Golf Association

Karnataka Golf Association (KGA), Bengaluru, is celebrated for its championship-standard course, lush fairways, and fast, true greens, making it a preferred destination for professional golfers and tournament organisers alike. Maintaining this level of excellence demands reliable, high-performance equipment - and a proven TORO fleet has long been central to KGA's maintenance programme.

To further enhance turf health and operational efficiency, IPI recently supplied TORO ProCore® 648s Aerators and TORO Debris Blowers, strengthening KGA's existing TORO fleet. The ProCore® aerators relieve soil compaction and promote stronger root systems, supporting faster turf recovery across greens, tees, and fairways, while the Debris Blowers ensure clean, well-presented playing surfaces.

These additions integrate seamlessly with KGA's core mowing equipment, including the TORO Reelmaster® 3575 for consistent, high-quality fairway maintenance and two TORO

Greensmaster® Flex™ 1021 units, delivering precise contour-following and superior cut quality on putting greens.

Together, this integrated TORO fleet enables KGA to maintain championship-level turf standards with efficiency and confidence. Backed by IPI's technical expertise and aftersales support as the TORO distributor, KGA continues to deliver an exceptional golfing experience.

IPI TORO – Expanding Excellence, Every Day.

Adding on TORO fleet at Zion Hills Golf County: Precision rolling for faster, truer and tournament-ready putting surfaces

At Zion Hills Golf County, delivering fast, true and tournament-ready putting surfaces is a top priority for course management. To achieve this, IPI has supplied the TORO GreensPro® 1260, a precision greens roller designed to enhance speed, smoothness, and consistency across greens.

The GreensPro® 1260 works in tandem with Zion Hills' existing TORO fleet, which includes TORO Flex 21 and the GR3250-D rough mower, ensuring a comprehensive approach to turf management - from fairways and roughs to putting surfaces. Its advanced rolling technology allows maintenance teams to fine-tune green speed and firmness, delivering surfaces that meet professional tournament standards while maintaining optimum turf health.

By integrating the GreensPro® 1260 into their maintenance programme, Zion Hills Golf County benefits from precision, efficiency, and reliability, enabling staff to consistently prepare championship-quality greens for members and tournament play. Supported by IPI's technical expertise and aftersales service, TORO continues to provide solutions that help elevate the playing experience and performance standards across the course.

IPI TORO – Precision, Performance and Tournament-Ready Greens.

Powered by TORO, Delivered by IPI: Enhancing Everyday Maintenance at East Point Golf Club

At East Point Golf Club, maintaining pristine playing surfaces has always been a priority. Recently, the course's routine turf care was further strengthened with the introduction of two TORO TimeCutter machines, supplied and supported by IPI. These advanced mowers bring precision, efficiency, and reliability to everyday maintenance, enabling the grounds team to achieve consistent, high-quality turf across the entire course.

Beyond supplying the equipment, IPI's involvement ensures tailored solutions and dedicated aftersales support, allowing the East Point team to focus on what matters most - delivering an exceptional golfing experience to members and visitors alike. With TORO's proven technology and IPI's commitment to excellence, tasks that once required extra time and effort are now completed faster and with greater precision.

This collaboration reflects IPI's broader philosophy of not just providing equipment, but empowering golf clubs with solutions that combine innovation, reliability, and service. At East Point Golf Club, powered by TORO and delivered by IPI, everyday maintenance has become more efficient, consistent, and ultimately more rewarding for both staff and golfers.

Kalhaar Blues & Greens: A Championship Course Sustained by TORO Technology and IPI Expertise

Located just an hour from Ahmedabad airport, Kalhaar Blues & Greens is a premier golf destination set within a 600-acre integrated township developed by the Navratna Group. At its core is an 18-hole, 7,425-yard championship course designed by Nicklaus Design, built to USGA standards and consistently ranked among India's finest.

The course is widely admired for its pristine greens and fairways, a result of strong management commitment combined with **TORO automated irrigation systems and turf maintenance equipment**. These are professionally supported by IPI, which works closely with the course team and is always available to deliver expert service and technical support directly at the site.

A recent highlight is the inauguration of the magnificent new clubhouse, now considered one of the largest and most impressive in Asia, further enhancing the club's stature as a

leading lifestyle and golfing destination.

Much of the credit for this remarkable destination goes to **Mr. Devang Shah**, the visionary behind Kalhaar. Charismatic and deeply committed to the sport, he has created not just a clubhouse or a golf course, but a landmark destination. Such was the impact of the visit that it inspired an immediate call to family - because Kalhaar is not merely a place to play golf, but a place to celebrate life's most meaningful moments.

Recognised as **India's Best Golf Course for five consecutive years** by the World Golf Awards, Kalhaar Blues & Greens stands as a strong example of how visionary leadership, **TORO Technology** and **IPI expertise** together deliver world-class standards.

Clover Greens Golf Course Advances Professional Greens Care

Clover Greens Golf Course continues to strengthen its commitment to high-quality greens management to ensure consistent playability and long-term turf health. As part of this focus, IPI TORO recently commissioned the TORO ProCore® 648s walk-behind greens aerator (48"), enhancing the course's aeration and turf recovery programme.

The ProCore® 648s relieves soil compaction, improves oxygen exchange, and promotes stronger root development - critical for maintaining resilient putting surfaces. Greens maintenance is further supported by four TORO Greensmaster® Flex™ 1021 units, delivering precise contour-following, consistent cut quality, and smoother ball roll.

Together, these TORO solutions reinforce Clover Greens' professional approach to greens care, supported by IPI's technical expertise and aftersales service.

Built for Toro. Trusted by Pros.

BEDKNIVES

Genuine Toro bedknives are carefully manufactured with the same rigid specifications and superior materials as our original equipment, delivering continued performance and reliability with every replacement bedknife.

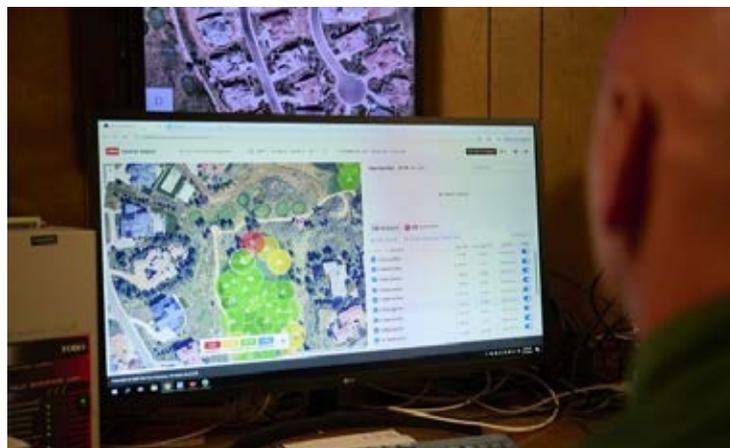

GOLF COURSE IRRIGATION: WATER MANAGEMENT & SUSTAINABILITY

Toro Revolutionizes Golf Course Irrigation with Spatial Adjust Software

Precision irrigation software helps superintendents reduce time and cost

Toro is proud to announce the availability of Spatial Adjust, a first-of-its-kind software tool that provides streamlined, precision irrigation control for golf courses. Now available for order, this innovative irrigation software was developed through an exclusive partnership with TerraRad and integrates exclusively with the **Toro Lynx® Central Control** platform.

Spatial Adjust is a game-changer for golf course irrigation, eliminating the need for manual labor in moisture monitoring and sprinkler adjustments. The software uses turfRad smart

sensors, which are installed on Toro equipment to map soil moisture levels in real time as the turf is being mowed. This real-time data is captured by Spatial Adjust and transmitted to the Toro Lynx Central Control platform.

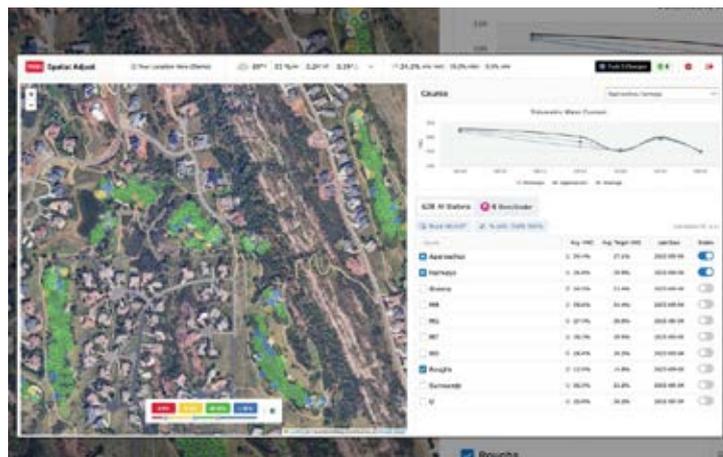

The Spatial Adjust software analyzes the data, creating color-coded maps that highlight moisture variations across the course and providing individual sprinkler adjustment recommendations that can be applied with the click of a button. Superintendents can set and customize specific moisture level targets and maintain full control with the flexibility to override the system as desired. By streamlining the process, Spatial Adjust helps create consistent, uniform fairway playing conditions and optimizes water usage while

ensuring control stays firmly in the superintendent's hands.

"The efficiency is incredible," says Steve Datwyler, director of grounds, Ravenna Country Club, Littleton, Colorado. "I started using Spatial Adjust on one hole and have now expanded to all 18. I'm using less water on them than before. I ran a projected flow and after pushing the updates, it was 90,000 gallons less. One of my long-time employees even commented this morning that he's never seen the moisture so consistent across the fairway. It's normally dry in one area or there's a spot where water flies up from the tires, but now it's consistent and uniform."

Spatial Adjust software equips superintendents with the ultimate tool for precision irrigation, seamlessly integrating cutting-edge data collection with the Lynx Central Control platform. Backed by Toro and TerraRad, it sets the new standard for golf course management.

FROM CONCEPT TO COURSE EXCELLENCE

IPI's Integrated Solutions for World-Class Golf at Pilikula Golf Club - Mangalore

Every successful golf course relies on more than just design and construction. Behind the scenes, specialized systems and expert support determine how smoothly the course performs, how efficiently it can be maintained, and how consistently it delivers a premium experience.

IPI played a key role in the recent renovation of Pilikula Golf Club providing high-performance irrigation, turf management, equipment solutions and on-course mobility systems that integrated seamlessly to enhance both playability and operational efficiency.

Honoured to support the inauguration of Pilikula Golf. Grateful for this memento recognizing IPI's contribution.

Automated TORO Irrigation, Designed and installed by IPI Irrigation Team

Water management is central to both turf quality and operational efficiency. IPI designed the automated TORO central-controlled irrigation system, customizing it to the course's layout, soil conditions and agronomic requirements.

From system design and supply through installation, testing,

and commissioning, IPI ensured that the TORO technology works precisely and reliably, delivering uniform turf performance, optimized water use, and scalable control that adapts as the course matures.

Turf and Maintenance Support

A golf course is a living asset that requires careful, ongoing attention. IPI provided turf and maintenance management support, guiding operations to maintain consistent quality and protect the course's long-term value. This ensures that

both fairways and greens perform at their best throughout the year.

TORO Turf Machinery on Rental

To meet intensive maintenance demands without significant capital investment, IPI supplied TORO turf machinery on a

rental basis. This flexible approach allowed the maintenance team to access professional-grade equipment as needed, maintaining efficiency, productivity and quality standards.

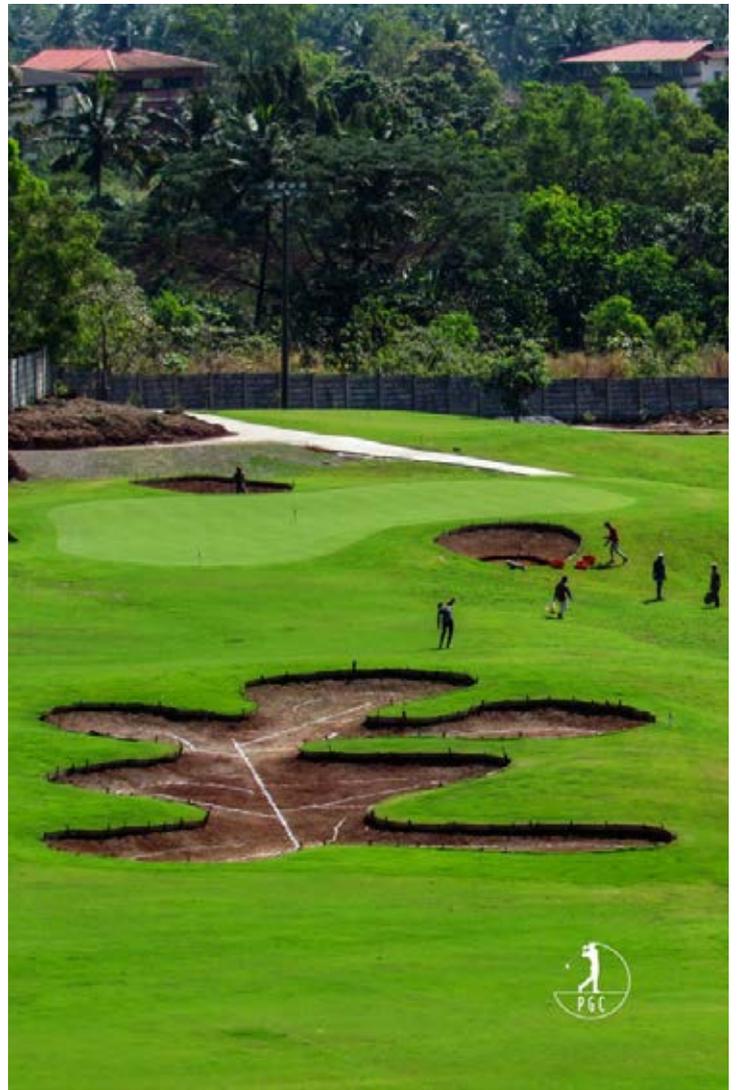

Elite Golf Cars for Seamless On-Course Mobility

IPI also supplied Elite Golf Cars, providing reliable, durable, and comfortable mobility across the course. Designed for smooth integration into premium golf environments, these vehicles support daily operations while enhancing the player experience.

A Milestone Moment

The renovated golf course was officially inaugurated on **9th January 2026**, followed by the **Pilikula Open Golf Tournament on 10th and 11th January**, showcasing the enhanced playing conditions, smooth operations, and premium experience delivered through IPI's integrated solutions.

A Trusted Partner for Developers and Operators

IPI's expertise lies in integrating technology, equipment and support services into a cohesive solution. By combining TORO irrigation design, turf management guidance, rental-based machinery and Elite Golf Cars, IPI simplifies operations, reduces risk and contributes lasting value to any golf course project.

IPI Specialist solutions. Trusted technologies. Long-term performance.

SMART TURF SOLUTIONS

Rent what you need.
When you need.

Play Smarter with IPI Rentals Programme

Professional Turf Care, When You Need It Most

Keeping your golf course in tournament-ready condition doesn't have to mean owning every piece of machinery. With IPI's Turf Equipment Rental Programme, you get access to top-of-the-line mowers, utility vehicles and maintenance equipment - with zero ownership stress.

Picture this: the early morning sun glints off pristine fairways, the hum of mowers and utility vehicles fills the air, and your course is in perfect condition for players - all thanks to a fleet that removes the burden of heavy maintenance and long-term investment. With shared care on site and expert support from IPI engineers, excellence is maintained every single day. **This is the IPI Rental Advantage in action.**

Flexibility That Matches Your Course's Needs

Whether preparing for a major tournament, handling seasonal maintenance, or simply keeping up with daily operations, IPI ensures the right machines are ready when you need them. Rental solutions allow courses to scale their fleet up or

down, reduce storage and depreciation concerns, and focus resources on delivering exceptional playing conditions.

Expert Support Beyond Equipment

IPI isn't just about machines; it's about service. Our team helps you select the right equipment for your course, provides technical guidance, and ensures smooth operations. With predictable rental costs, clubs can plan budgets confidently while keeping operations seamless.

Simplifying Turf Care, Elevating Standards

The benefits of rental are tangible: less downtime, smoother operations, and access to the latest turf care technology. Courses across India are discovering that championship-level greens don't require ownership - they require the right support, flexibility, and expertise, all delivered by IPI.

Discover the IPI Advantage

From small layouts to championship courses, IPI's Turf Equipment Rental Programme helps turf managers maintain world-class standards every day, without the burden of ownership. It's reliability, flexibility and excellence - simplified.

GOLF CAR: Comfort & Style

Innovation on Wheels: Yamaha's Next-Gen Golf Carts at Zion Hills Golf County

Smoother rides, better efficiency, and smarter energy use with lithium-ion batteries

Zion Hills Golf County has raised the bar in golf mobility with the arrival of Yamaha's next-generation golf carts, combining eco-friendly performance with cutting-edge design. These carts offer smoother rides, improved energy efficiency, and enhanced comfort, making every round of golf a seamless experience.

Designed for modern courses and environmentally conscious operations, Yamaha's latest fleet demonstrates how technology and sustainability can go hand-in-hand, helping clubs optimize both player experience and operational efficiency.

A Smarter Way to Upgrade: The Operating Lease Advantage

What makes this transformation even more remarkable is how Zion Hills Golf County achieved it. IPI supplied the entire fleet through an innovative Operating Lease model, eliminating traditional barriers to fleet modernization.

This approach offers golf courses a strategic advantage with:

- **No upfront investment** – Access premium Golf Cars fleet without capital expenditure

- **Predictable monthly costs** – Budget-friendly payments that simplify financial planning
- **Zero maintenance headache** – IPI handles all service and upkeep
- **Improved cash flow** – Preserve working capital for other course improvements

The Operating Lease model has proven particularly valuable for courses looking to upgrade their fleets without straining their budgets, making cutting-edge golf cart technology accessible and financially sustainable.

With IPI's trusted support and comprehensive service, Zion Hills ensures these innovative carts perform at their peak, delivering reliability, style, and smarter energy use across the course.

"Smarter, greener, smoother - Yamaha's innovation drives the future of golf mobility."

A Fresh Drive at Kharghar Valley Golf Course (KVGC)

Yamaha Golf Cars Redefine Style, Reliability and Support

Kharghar Valley Golf Course (KVGC) in Navi Mumbai has commissioned a **new fleet of 10 Yamaha Golf Cars**, supplied by IPI, bringing a fresh, contemporary presence to the course.

Finished in distinctive Yamaha colours, the new fleet blends seamlessly with KVGC's natural landscape while elevating its visual identity. Quiet, smooth, and refined, the cars enhance everyday mobility across the course without disturbing the rhythm of play.

Renowned worldwide for engineering excellence, Yamaha Golf Cars are built for reliability, comfort, and long-term performance, delivering consistent results across varied terrain and operating conditions.

Equally important is the strong service backbone provided by IPI. With its dedicated service team available on site, IPI ensures prompt support, minimal downtime, and dependable day-to-day operations - allowing KVGC to focus fully on delivering a superior golfing experience.

This commissioning reflects KVGC's commitment to quality and efficiency, supported by IPI's proven expertise in equipment supply and after-sales service.

A fresh look for Kharghar Valley Golf Course - where **Yamaha reliability meets unmistakable style**, backed by IPI's trusted service support.

Chosen by the Best: Yamaha Golf Cars, Where Reliability Meets Intelligent Engineering

In environments where precision, consistency, and uninterrupted performance define everyday operations, the choice of mobility equipment becomes critical. Across India's most respected golf courses, premium residential communities, and leading institutional campuses, Yamaha Golf Cars have emerged as a trusted standard - valued for their engineering integrity, advanced technology, and proven reliability in real-world conditions.

This preference is not incidental. It is the result of years of dependable performance in demanding environments where downtime is not an option and quality is non-negotiable.

A Trusted Presence on Championship Fairways

From the heritage fairways of **Poona Golf Club** to the immaculately maintained landscapes of **DLF Golf Course**, Yamaha Golf Cars operate seamlessly as an integral part of daily course management. At **Palm Grove Golf Course** and **CIAL Golf Course**, they support golfer movement with quiet efficiency, contributing to smooth operations without disturbing the rhythm of play.

In the south, the **Tamil Nadu Golf Federation (TNGF)** relies on Yamaha fleets to deliver consistent performance across high-traffic usage and where reliability and comfort are equally essential.

Beyond Golf: Performance Across Campuses and Public Spaces

Yamaha's appeal extends well beyond the fairways. On large institutional campuses such as **Hindustan Institute of Technology & Science** and **Sree Vidyanikethan Educational Trust**, Yamaha Golf Cars facilitate efficient, safe, and sustainable movement across expansive grounds, supporting day-to-day academic life with minimal operational interruption.

In prominent public and corporate environments, including **Science City, Kolkata** - sponsored by **Petronet LNG Ltd.** - and facilities managed by **CBRE South Asia Pvt. Ltd.**, Yamaha Golf Cars are valued for their durability, ease of operation, and ability to perform reliably across varied terrain and usage patterns.

Engineered for Reliability, Built for the Long Term

At the heart of every Yamaha Golf Car lies advanced drivetrain technology, superior build quality, and intelligent energy-efficient systems. These engineering strengths translate into smooth, responsive operation, reduced maintenance requirements, and dependable uptime - key factors for organisations that demand consistency over the long term.

Designed to withstand intensive daily use, Yamaha Golf Cars deliver a balance of performance and efficiency that supports

both operational productivity and user comfort, regardless of environment.

Customization That Delivers Unique Solutions

IPI goes beyond standard fleet deployment by offering comprehensive customization based on specific customer requirements. A standout example is the specialized **Fire Buggy** supplied to **The Camellias** - a wonderful masterpiece from IPI's customization team that showcases the engineering flexibility and creative problem-solving capabilities available to clients. Whether it's specialized emergency response vehicles, unique cargo configurations, or purpose-built mobility solutions, IPI's technical expertise transforms standard platforms into precisely tailored assets that meet exact operational needs.

Strengthened by IPI's Service Excellence

What completes the Yamaha experience is the assurance of IPI's robust service and support network. From preventive maintenance programmes to prompt on-site technical assistance, IPI ensures that Yamaha Golf Cars continue to perform at their best throughout their lifecycle. Expert service engineers, genuine parts availability, and responsive support bring confidence to every fleet deployment.

A Partnership Built on Performance and Trust

Together, Yamaha Golf Cars and IPI represent more than a mobility solution. They offer a partnership grounded in reliability, technology, and service excellence - delivering peace of mind to some of India's most discerning golf courses, institutions, and communities.

When performance must be consistent, technology must be proven, and support must be unwavering, Yamaha Golf Cars remain the choice of those who set the benchmark.

Luxury in Motion: Yamaha Golf Cars at Taj Resorts

Tailored Comfort, Trusted Reliability and IPI Expertise

From the serene beaches of **Taj Fisherman's Cove** to the tropical beauty of **Taj Andaman**, the cultural charm of **Taj Puri Resort & Spa, Odisha**, and the vibrant landscapes of **Taj The Gandhinagar in Gujarat**, Yamaha Golf Cars are now the preferred mobility solution across all **Taj resorts**.

Chosen for their reliability, smooth performance, and advanced technology, these carts are customised by IPI to meet the unique operational and guest-experience requirements of

each property. From luxury resorts to sprawling grounds, every vehicle is designed to deliver maximum comfort, effortless handling, and elegant efficiency.

Luxury demands excellence, and Yamaha Golf Cars, backed by IPI's trusted service support at the client's doorstep, ensure that these resorts maintain seamless operations and superior guest experiences.

Whether transporting guests, staff, or supplies, Yamaha and IPI bring a perfect combination of performance, style, and dependable support - demonstrating why luxury hospitality chooses nothing less than the best.

"When luxury moves, it moves on Yamaha - customised for comfort, backed by IPI service."

Elite Cars: Redefining Sustainable Mobility Across India's Finest Destinations

Sustainable mobility is no longer a peripheral consideration - it has become central to how premium destinations, campuses, and large-format developments operate and present themselves. From championship golf courses and luxury resorts to universities, healthcare facilities, and landmark public spaces, the need for quiet, efficient, and environmentally responsible internal transport has never been greater. Addressing this need with purpose and precision is the Elite Car range, a proven electric mobility solution backed by IPI's renewed and dependable service ecosystem.

Across India, Elite Cars are increasingly becoming the vehicle of choice where performance, sustainability and experience must coexist seamlessly.

Where Experience Meets Responsibility

On the rolling fairways of **Pilikula Golf Club** in Mangalore, a complete fleet of Elite Golf Cars has been deployed to serve players and course operations with quiet efficiency and consistent performance. Within the storied grounds of the **Royal Calcutta Golf Club**, Elite Cars move effortlessly along pathways where silence, elegance, and reliability are essential. Here, mobility is not merely functional - it is part of

the golfing experience itself.

The same philosophy extends to destination properties such as Karma Lakelands, where an extensive fleet of Elite Cars enhances guest mobility across the expansive property, and the iconic **Vivanta by Taj – Fort Aguada Resort & Spa** in Goa, where a carefully configured fleet ensures guests experience smooth, unobtrusive transportation that complements the calm of the surroundings.

In large public and ecological spaces such as **Janeshwar Mishra Park** and the thoughtfully developed Avadh Nature Project in Navsari, Elite Cars support sustainable movement while preserving the natural character of the environment. The **Avadh Group** deployment showcases IPI's customization capabilities with different configurations including specialized Food Box vehicles for catering logistics and Housekeeping Vehicles for property maintenance - demonstrating how electric mobility can enhance accessibility without compromising ecological intent.

Designed for Scale, Built for Versatility

Elite Cars have been engineered to adapt to a wide spectrum of operational needs. Educational campuses such as Joy University in Tamil Nadu and O. P. Jindal Global University in Haryana rely on these vehicles to enable safe, efficient movement across expansive grounds, connecting academic blocks, hostels, and common facilities with ease.

Similarly, within premium residential and mixed-use developments like **Prestige Waterford** and **Prestige PrimeRose**, Elite Cars contribute to a refined, future-ready living environment - quietly transporting residents and visitors while aligning with sustainability benchmarks increasingly expected in modern real estate.

Hospitality and retreat destinations, including **The Dukes Retreat in Maharashtra**, and healthcare institutions such as **Metro Speciality Hospitals in Haryana**, further underline the versatility of Elite Cars - where comfort, reliability, and operational continuity are critical on a daily basis.

Configurations That Fit Every Application

One of the defining strengths of the Elite Car range is its flexibility. Available in configurations ranging from compact 2-seater utility vehicles to 4, 6 and up to 14-seater shuttle models, Elite Cars can be tailored to specific operational requirements. Open-to-sky designs are ideal for leisure environments and resorts, while roofed versions provide all-weather practicality for campuses, hospitals, and industrial premises.

At the heart of every Elite Car lies advanced lithium battery technology, delivering longer service life, faster charging

cycles, and significantly reduced maintenance. The result is lower total cost of ownership and a meaningful reduction in environmental impact - without sacrificing performance or reliability.

Powered by Technology, Supported by IPI

What truly differentiates the Elite Car experience is the assurance that comes with IPI's trusted service support. Each vehicle is backed by a renewed, well-established service

Avadh Nature Projects, Navsari

framework that ensures prompt assistance, genuine spares availability, and long-term operational confidence. For organisations making a strategic shift toward electric mobility, this support is as important as the vehicle itself.

Moving Forward, the Right Way

The growing presence of Elite Cars across India's most respected institutions and destinations reflects a clear shift in mindset. Sustainable mobility is no longer seen as an alternative - it is the preferred standard. Elite Cars enable organisations to reduce their carbon footprint, elevate user experience, and demonstrate environmental responsibility in a way that is both visible and impactful.

With IPI's commitment to quality and service, Elite Cars are not just transporting people - they are driving a quieter, cleaner, and more responsible future for shared spaces across the country.

Toro's Innovation: Enhancing Golf Course Maintenance & Water Efficiency

The Toro-IPI Golf Industry Conference 2025, on 2nd June 2025 held at the Karnataka Golf Association, Bangalore, marked a strong beginning to a new series of industry engagements, drawing wide participation from superintendents, greenkeepers, and workshop managers representing major golf courses across Southern India.

Organised under the theme “Toro's Innovation: Enhancing Golf Course Maintenance & Water Efficiency”, the conference reflected IPI's integrated approach to leadership, education, and technical excellence. The event was led by our late Mr. Ravi Garyali, Managing Director, whose vision continues to position IPI as a total solutions provider for the Indian golf industry, alongside Mr. Siva Kumar, IPI CEO, who reaffirmed the company's commitment to sustainability, innovation and professional development.

The programme featured global insights from **Cameron Russell, Director – Asia**, Toro, and **Mark Kolentsis, Senior Regional Manager – Asia**, Toro, complemented by industry perspectives from **Jim Schumacher, President of Aqua Turf International**. Practical, on-course experiences were shared by **Declan McCollam-PGA, General Manager, Prestige Golfshire Club - Troon Golf** and **Benjamin McLean, Superintendent, Prestige Golfshire – a Troon Golf**–managed course, highlighting the real-world application of modern maintenance practices.

Running concurrently, a hands-on technical training session was conducted at the KGA workshop by our Mr. Raju Purushotham, Service Head, focusing on equipment care, preventive maintenance, and workshop efficiency - reinforcing IPI's strong after-sales and service culture.

The event was expertly organised and seamlessly managed, by IPI team. Special Thanks to managing committee of KGA for their continued support to organize such training programs. Mr. Babu, the meticulous Superintendent of KGA, whose knowledge sharing on the best practices followed at KGA provided the great value to the participants.

The conference successfully brought together innovation, expertise and collaboration, reaffirming IPI-Toro's commitment to advancing golf course standards and supporting the superintendent community across Southern India.

GOLF COURSE CONSTRUCTION

Crafting Golfing Excellence in the Misty Hills of Coorg - The IPI Way

In the serene, mist-draped hills of Coorg, a distinctive golfing landmark is steadily taking shape. At Galibidu, IPI is delivering a golf course that reflects the depth of its construction expertise and its long-standing commitment to building world-class golfing environments in challenging terrains.

Led by IPI's experienced **Golf Construction Team**, the project exemplifies a holistic approach to course development - combining detailed planning, advanced engineering, and an intimate understanding of natural landforms. Working within the complexities of hill terrain, the team is carefully shaping fairways, greens and play corridors that respect the landscape while enhancing playability, drainage and long-term sustainability.

IPI's strength lies not only in execution but in end-to-end

capability. From earthworks and shaping to irrigation design, installation and optimisation, every element is managed by specialists who understand the operational demands of a modern golf course. The Galibidu project demonstrates how technical precision and on-ground experience come together to transform rugged topography into a refined golfing experience.

When complete, the course will offer dramatic elevation changes, panoramic views, and a layout that challenges golfers while immersing them in Coorg's pristine air and natural beauty. More importantly, it will stand as a testament to IPI's ability to deliver reliable, future-ready golf courses - designed to perform, endure, and inspire.

For developers and clubs envisioning their own golf course journey, Galibidu reinforces what IPI brings to every project: proven expertise, integrated solutions and the confidence to build excellence - anywhere the land demands it.

FROM START TO FINISH

Golf Course Construction: The Green Advantage for Developers

In India's fast-evolving real estate landscape, projects that stand out are the ones that create more than just homes – they create destinations. One amenity that consistently elevates property value, enhances prestige and accelerates sales is golf course construction.

Whether it's a championship 18-hole course, a compact 9-hole layout or a thoughtfully designed mini golf facility, golf can transform a development into a lifestyle community that attracts premium buyers and long-term investment.

Why Golf Works for Real Estate

For over three decades, golf-linked real estate has demonstrated a strong track record of premium positioning. Across India and globally, golf-facing properties regularly command 20–50% higher prices than comparable non-golf properties. Beyond financial gains, golf adds exclusivity, greenery and wellness – qualities increasingly sought by discerning buyers.

Golf amenities also bring:

- Faster absorption rates – properties with golf access or views sell quicker
- Brand differentiation – in competitive markets, golf creates a unique identity
- Community longevity – golf fosters year-round activity, creating vibrant neighbourhood

Choosing the Right Golf Format

Not every development requires an 18-hole championship course. Developers today are exploring formats that maximise value within available land, water and budget resources:

- 18-hole courses – anchor large-scale, premium townships and resorts
- 9-hole layouts – fit mid-size developments, balancing land efficiency with lifestyle appeal
- Mini golf and short-game areas – provide recreational value for families and attract diverse age groups

Each format offers distinct commercial advantages. The key is aligning the facility with the project's positioning and long-term vision.

The IPI Difference

At Irrigation Products International (IPI), we have been at the forefront of golf course construction in India for more than 30 years. From world-class 18-hole courses to innovative compact layouts, we combine engineering precision, agronomic expertise and sustainable practices to deliver turnkey solutions.

Our approach is always customised: we assess land potential, water availability and developer objectives before recommending the most suitable golf solution. The result? Facilities that are not just beautiful to play, but commercially viable and sustainable to maintain.

Golf as a Strategic Asset

Golf is emerging as more than an amenity – it is a strategic investment. Developers benefit through:

- Higher property values – golf-facing units can sell at significant premiums
- Expanded buyer pool – attracting executives, NRIs, investors and lifestyle buyers
- Resilience in market fluctuations – golf communities maintain value better than standard developments
- Long-term revenues – through memberships, tournaments, day players and F&B operations

When planned and executed with the right partner, golf can be the cornerstone of a project's success.

Ready to Bring the Green Advantage to Your Development?

IPI stands ready to partner with developers to deliver golf course construction projects that transform developments into lifestyle destinations.

SPECIAL FOCUS ON: Educational Events

IPI- TORO & VENTRAC: Two-Day Training at Bombay Presidency & Wellington Sports Club

Hands-On Learning for Superior Turf and Equipment Performance

IPI-TORO recently hosted a **two-day training event at Bombay Presidency Golf Club**, with additional sessions engaging teams from **Wellington Sports Club**, bringing together maintenance staff from leading clubs across Maharashtra.

The first day featured a hands-on TORO Service Training, led by **Raju Purushotham, IPI General Manager – Service**, focusing on equipment care, preventive maintenance, and optimising machine performance to ensure superior turf health. The second day showcased a **Ventrac Product Demonstration**, presented by **Shreyas Muthappa, IPI Regional Sales Manager**, highlighting the versatility and efficiency of the Ventrac range for golf course and landscape applications.

With full participation and guidance from the IPI-TORO Service Team, attendees gained practical insights, interactive

support, and valuable knowledge to enhance daily operations. The sessions reinforced IPI-TORO's commitment to innovation, education, and exceptional customer support in the golf industry.

We extend our sincere thanks to all participants and our expert team for making this event a resounding success.

"Hands-on learning, practical insights, and expert guidance - delivering excellence in turf management."

A Historic Milestone for Indian Golf: AGIF Certificate in Greenkeeping

The Indian golf industry reached a landmark moment at Oxford Golf Resort, Pune, with the successful conclusion of the first-ever Asian Golf Industry Federation (AGIF) Certificate in Greenkeeping (CIG) program, supported by The R&A and led by Richard Walne, AGIF CIG Chair and Managing Director – Toro, Europe, Middle East & Africa.

A total of 24 greenkeepers from across India completed the program and received their certificates, marking a new chapter in professional standards, technical knowledge, and best practices for golf course maintenance nationwide.

The program's finale was hosted by Mr. Anil Seolekar, Owner of Oxford Golf Resort, and guided throughout by Ravi Garyali, Managing Director of IPI, whose vision and commitment were instrumental in championing this transformative initiative. Richard Walne's expertise and mentorship provided participants with practical, high-level insights into modern greenkeeping, elevating course management standards across the country.

This landmark initiative reflects IPI-TORO's ongoing dedication to training, innovation, and raising industry benchmarks, reinforcing India's growing presence on the global golf stage.

24 greenkeepers. One milestone. A new era in Indian golf.

Oxford Premier League (OPL) Golf Tournament: A Celebration of Sport and Partnership

Oxford Golf Resort also hosted the Oxford Premier League (OPL) Golf Tournament, a vibrant celebration of competitive golf, camaraderie, and refined hospitality.

Set within the resort's picturesque surroundings, the tournament delivered engaging competition and a dynamic atmosphere, strengthening its reputation as a key fixture on the regional golfing calendar.

IPI-TORO was a proud sponsor of the event, reaffirming its commitment to supporting premier golfing initiatives and the continued growth of the sport in India. The tournament was graciously hosted by the Seolekar family, whose warmth and hospitality added a distinctive personal touch.

The presence of Mr. and Mrs. Garyali on behalf of IPI-TORO reflected the organization's close association with Oxford Golf Resort and its longstanding partnerships with institutions that champion excellence in golf.

A Vision That Continues to Shape Indian Golf

Through initiatives that advance professional capability and events that celebrate the spirit of the game, Oxford Golf Resort stands as a platform where leadership, learning, and sporting excellence converge - contributing meaningfully to the evolution of Indian golf.

IPI Service Conference 2025- Chennai Driven to SOLVE. Committed to EVOLVE.

Two days, one team, infinite drive – committed to solving, evolving and delivering excellence on the field.

The IPI Service Conference 2025 brought together our Service Engineers - that we call “IPI Ambassadors” - from **Pune, Mumbai, Goa, Hyderabad, Coimbatore, and Bangalore** for two days of learning, collaboration and inspiration in Chennai.

This intensive meet-up combined hands-on product updates, interactive training sessions, and team-building activities

designed to challenge both mind and spirit. It was a celebration of the expertise, energy, and commitment that our service team brings to the field every day.

Reflecting the spirit of IPI’s tagline - “**Driven to SOLVE. Committed to EVOLVE.**” - the conference strengthened collaboration across regions, reinforced knowledge sharing, and highlighted the innovative approaches that define IPI’s service excellence.

With passion, professionalism, and a relentless drive to deliver smarter solutions, our service team continues to **raise the bar in supporting India’s golf and turf industry.**

IPI at the GIA Golf & Turf Summit

From Toro's precision turf solutions to Yamaha & Elite golf cars IPI showcased the future of golf course construction - *Innovation, Partnerships and Excellence in Indian Golf*

Industry leaders - including course superintendents, managers, architects, and contractors - gathered at the **GIA Golf & Turf Summit & Expo** held in October in Hyderabad, at Boulder Hills Golf & Country Club, to explore new technologies and discuss the future of golf and turf management.

At the event, IPI, TORO, Yamaha, Elite and Watertronics displays highlighted real, working solutions - from turf maintenance machinery to irrigation systems, water pumping intelligence, multipurpose equipment, and modern golf cart fleets. Attendees engaged in hands-on demonstrations, interactive discussions, and practical guidance, underscoring IPI's commitment to innovation, education, and sustainable operations.

IPI also reaffirmed its expertise in golf course construction, presenting projects from its extensive portfolio and showcasing the team of specialists who deliver complete,

end-to-end solutions across the golf industry. This positions IPI as a total solution provider, supporting clients from construction to maintenance and technology deployment.

Celebrating Excellence

The summit was also a proud moment for IPI, which received a Memento of Appreciation from the Golf Industry Association – India, recognising our continued support to the Indian golf and turf community. The memento was received by CEO Siva Kumar and General Manager Antony Samy, on behalf of IPI,

whose vision laid the foundation for IPI's legacy of excellence.

Our Ranga Babu Vadlamudi, COO of IPI, has been awarded as Best Irrigation System Design & Execution while Raju Purushotham, General Manager Service has received the Memento for the participation of IPI – YAMAHA GOLF CAR.

"These recognitions, alongside the summit's showcases and conversations, reflect what defines IPI: engineering with integrity, execution with responsibility and service with heart," said the team.

Looking Ahead

IPI extends sincere gratitude to all participants, clients, partners, and the wider golf community for their trust and collaboration. The summit reinforced IPI's mission to deliver reliable, sustainable, and performance-driven solutions, supporting the growth of India's golf and turf industry.

"Innovation, trust and partnerships—this is what defines the IPI legacy in Indian golf."

"Client First. Always. That's the philosophy behind everything we do."

THANKASUPER

#ThankASuper Day

9th September 2025

Heartfelt thanks to all our Superintendents and Greenkeepers for the professionalism and great efforts!

They Call You “Supers” – But You’re Simply Extraordinary

Celebrating the People Behind Perfect Greens on THANKASUPER day!

Every golfer’s best day is made possible by 365 days of dedication from superintendents. While players sleep, they monitor moisture levels. While coffee brews in the morning, they adjust pin positions. While golfers enjoy perfect conditions, they are already planning tomorrow’s magic. As **Ravi Garyali, Founder & MD of IPI**, puts it, “*You are the diamonds hidden beneath golf’s green surface.*”

This Superintendent’s Day, the golf industry came together to honour these unsung heroes who craft experiences, preserve traditions, and enable dreams. Their expertise in agronomy, irrigation, pest management, and course design transforms ordinary land into world-class golfing paradises. Truly, they are the Doctors of the Greens.

From Oxford Golf Resort Pune to Prestige Golfshire Club, Prestige Augusta Golf Club, Karnataka Golf Association, Hyderabad Golf Association, Zion Hills Golf County and many others, the industry paused to recognize the tireless efforts of these professionals.

Anirudha Seolekar, owner of Oxford Golf Resort Pune and President of the Golf Industry Association – India, who delivered a heartfelt message on #ThankASuper Day, calling superintendents “*not just workers in golf – you are golf itself.*”

Declan McCollam, General Manager of Prestige Golfshire

Club – Troon Golf, who reflected on 30+ years of experience, emphasizing the dedication and expertise superintendents bring every day.

Every blade of grass, every pristine bunker, and every perfectly rolling green is a testament to their passion, skill, and unwavering dedication. This is recognition, not just appreciation - a declaration that the work of superintendents makes golf possible.

“*You don’t just work IN golf – you ARE golf.*” – Anirudha Seolekar

“*Superintendents are the unsung heroes who make every round possible.*” – Declan McCollam

This Superintendent’s Day, we salute the extraordinary commitment, expertise and heart that defines the people behind perfect greens.

MAINTENANCE TIPS

Cultural Practices: Building Consistency Above and Below the Turf

Cultivation practices are an important part of golf course turf management. Certain cultural practices such as mowing, verticutting, and rolling are necessary to provide a high-quality playing surface, while others such as aerification are required to enhance plant health.

Heavily used areas such as putting greens often deteriorate because of compacted soil, thatch accumulation, and excessive use. Soil problems from active use are usually limited to the top 3 inches of the soil profile and should be actively managed to enhance turf health and improve nutrient and water uptake.

Unlike annual crops, which offer the opportunity for periodic tilling of the soil profile to correct problems like soil compaction that might develop over time, turfgrass does not offer opportunities for significant physical disturbance of the soil without destroying the playing surface.

Mowing Principles:

- Mowing is the most basic yet most important cultural practice to consider when developing a management plan.
- The mowing practices implemented on a facility will have an impact on turf density, texture, color, root development, and wear tolerance.
- Mowing practices affect turfgrass growth. Frequent mowing will increase shoot density and tillering. It will also decrease root and rhizome growth as a result of plant stress associated with removal of leaf tissue.
- Infrequent mowing results in alternating cycles of vegetative growth followed by scalping, which further depletes food reserves of the plants.
- Proper mowing height is a function of the species/cultivar being managed and the intended use of the site. Other factors influencing mowing height include mowing frequency, shade, mowing equipment, time of year, root growth, and abiotic and biotic stress.

- Maintaining an optimal root-to-shoot ratio is critical. Turfgrass plants that are mowed too low will require a substantial amount of time to provide the food needed to produce shoot tissue for future photosynthesis. If turf is mowed too low in one event, an imbalance occurs between the remaining vegetative tissue and the root system, resulting in more roots being present than the plant needs physiologically. As a result, the plants will slough off the unneeded roots. Root growth is least affected when no more than 30% to 40% of leaf area is removed in a single mowing.

- Failure to mow properly will result in weakened turf with poor density and quality.

Best Management Practices:

- » Mowing frequency should increase during periods of rapid growth and decrease during dry, stressful periods.
- » If turf becomes too tall, it should not be mowed down to the desired height all at once. Such severe scalping reduces turf density and can result in a dramatic reduction in root growth. Tall grass should be mowed frequently and height gradually decreased until desired height of cut is achieved.
- » Shade affects turfgrass growth by filtering out photosynthetically active radiation. As a result, turfgrass plants respond by growing upright in an effort to capture more light to meet their photosynthetic needs. As a result, mowing height should be increased by at least 30% to improve the health of turf grown in a shaded environment.
- » The use of the plant growth regulator trinexapac-ethyl has been shown to improve overall turf health when used as a regular management tool for grasses growing in shaded environments.
- » Environmental stresses such as prolonged cloudy weather or drought can have a significant impact on turf health. Increase mowing heights as much as use will allow in order to increase photosynthetic capacity and rooting depth of plants.
- » Use proper mowing equipment.

- » Reel mowers are ideally suited for maintaining turfgrass stands that require a height of cut below 1.5 inches. They produce the best quality when compared to other types of mowers.
- » Rotary mowers, when sharp and properly adjusted, deliver acceptable cutting quality for turf that is to be cut above 1 inch in height. Dull blades will result in shredding of leaf tissue, increasing water loss and the potential for disease development.
- » Flail mowers are most often used to maintain utility turf areas that are mowed infrequently and do not have a high aesthetic requirement.
- » Mowing patterns influence both the aesthetic and functional characteristics of a turf surface.
- » Turfgrass clippings are a source of nutrients, containing 2% to 4% nitrogen on a dry-weight basis, as well as significant amounts of phosphorus and potassium.
- » Nutrients contained in clippings can be sources of pollution and should be handled properly.
- » Clippings should be returned to the site during the mowing process unless the presence of grass clippings will have a detrimental impact on play. Cases when clippings should be removed include times when the amount of clippings is so large that it could smother the underlying grass or on golf greens where clippings might affect ball roll.
- » Collected clippings should be disposed of properly to prevent undesirable odors near play areas and to prevent fire hazards that can occur when clippings accumulate. Consider composting clippings or dispersing them evenly in natural areas where they can decompose naturally without accumulating in piles.

Cultivation Principles:

- Cultivation involves disturbing the soil or thatch through the use of various implements to achieve important agronomic goals that include relief of soil compaction, thatch/organic matter reduction, and improved water and air exchange.
- Cultivation techniques will result in disturbance of the playing surface that can require significant time for recovery.
- Frequency of cultivation should be based on traffic intensity and level of soil compaction.
- Core aeration is effective at managing soil compaction and aiding in improvement of soil drainage.
- Accumulation of excessive thatch and organic matter will reduce root growth, encourage disease, and create undesirable playing conditions.
- Light and frequent applications of sand will smooth the playing surface, control thatch, and potentially change the physical characteristics of the underlying soil when done in conjunction with core aeration.

Best Management Practices:

- » Core aeration involves removal of small cores or plugs from the soil profile. Cores are usually 0.25 to 0.75 inch in diameter. Annual core aeration programs should be designed to remove 15%-20% of the surface area. High-traffic

areas may require a minimum of two to four core aerifications annually.

- » Core aeration should be conducted only when grasses are actively growing to aid in quick recovery of surface density.
- » Vary depth of aeration events by incorporating varying length tines to prevent development of compacted layers in the soil profile as a result of cultivation.
- » Solid tines cause less disturbance to the turf surface and can be used to temporarily reduce compaction and soften surface hardness during months when the growth rate of grasses has been reduced. Benefits of solid-tine aeration are temporary because no soil is removed from the profile.
- » Deep-drill aeration creates deep holes in the soil profile through use of drill bits. Soil is brought to the surface and distributed into the canopy. Holes can be backfilled with new root-zone materials if a drill-and-fill machine is used. These machines allow replacement of heavier soils with sand or other materials in an effort to improve water infiltration into the soil profile.
- » Slicing and spiking reduce surface compaction and promote water infiltration with minimal surface damage.
- » Slicing is faster than core aeration but is less effective. Slicing is best accomplished on moist soils.
- » A spiker can break up crusts on the soil surface, disrupt algae layers, and improve water infiltration.
- » Vertical mowing (verticutting) can be incorporated into a cultural management program to achieve a number of different goals. The grain of a putting green can be reduced by setting a verticutter to a depth that just nicks the surface of the turf. Deeper penetration of knives will stimulate new growth by cutting through stolons and rhizomes while removing accumulated thatch.
- » Verticutting depth for thatch removal should reach the bottom of the thatch layer and extend into the surface of the soil beneath the thatch.
- » Dethatching with a verticutter is an aggressive practice that is not recommended on golf putting greens because of the damage that occurs and the extensive recovery time required.
- » Initiate vertical mowing when thatch level reaches 0.25 to 0.5 inch in depth. Shallow vertical mowing should be completed at least monthly on putting greens to prevent excessive thatch accumulation.
- » Groomers, or miniature vertical mowers attached to the front of reels, are effective at improving management of grain and improving plant density through cutting of stolons.
- » Topdress the playing surface with sand following core aeration and heavy vertical mowing to aid in recovery of turf. Rates will vary from 0.125 to 0.25 inch in depth and will depend on the capacity of the turf canopy to absorb the material without burying the plants.
- » Light, frequent applications of topdressing sand on putting greens can smooth out minor surface irregularities, aiding in the management of thatch accumulation.

- » Use only weed-free topdressing materials with a particle size similar to that of the underlying root zone.
- » Use of finer materials can result in layering and can have a negative impact on water infiltration.
- » Daily rolling of putting surfaces following mowing can increase putting speeds by roughly 10%, allowing for improved ball roll without lowering height of cut.
- » To minimize potential for compaction caused by rolling, use light weight rollers.

Overseeding Warm-Season Turfgrass Principles:

- The fundamental purpose of overseeding is to establish a temporary cool-season grass into the warm-season base for improved color and playability during the fall and winter when the warm-season grass enters dormancy.
- Overseeding increases the need for irrigation and routine mowing and may result in significant thinning of the base grass during spring transition.
- Successful overseeding programs require year-long planning and incorporate all aspects of root-zone cultivation and weed control in an effort to maintain health of the warm-season turfgrass while allowing successful establishment of the overseeded cool-season grass species.

Best Management Practices:

- » Thatch depth greater than 0.5 inch in the warm-season turfgrass base will prevent good seed-to-soil contact and will result in sporadic germination and establishment. Remove thatch as part of an active cultivation program before overseeding.
- » Reduce or eliminate fertilization of the base grass three to four weeks before the planned seeding date to minimize growth and competition.
- » Core-aerify the soil four to six weeks before the planned overseeding date to open turf canopy and aid in uniform establishment of overseeded grass.
- » Select grass species/cultivars that are adapted to the desired use, taking note of disease resistance and spring transition traits. Cultivars with improved heat tolerance can delay spring transition and create increased competition for

water, nutrients, and light with the warmseason turfgrass base.

- » Irrigate newly planted overseed to maintain constant moisture levels, not allowing the soil surface to dry out. Gradually reduce irrigation once the seedlings have been mowed.
- » Do not fertilize with nitrogen immediately before or during establishment of overseed as the N may encourage warm-season turfgrass competition and increase disease potential.
- » Move hole locations on putting greens daily during the establishment period to minimize damage to seedlings from foot traffic.
- » Reduce fertilizer rates in spring to slow growth of overseeded grass. Once warm-season turfgrass regrowth is apparent, restore fertilizer applications to stimulate growth of the warm-season turfgrass.
- » Colorants (dyes and pigments) can be used to provide winter color to dormant grasses.
- » Overseeding practices can generate significant dust that may require dust control measures.

Shade and Tree Management Principles:

- In general, most turfgrasses perform best in full sun.
- Excessive shade reduces photosynthesis and air circulation, thus increasing the susceptibility of the turf to pest and disease problems.

Best Management Practices:

- » Prune tree limbs and roots as needed to reduce competition for sunlight, water, and nutrients.
- » When possible, trees located near closely mowed areas such as tees and greens should be removed or their canopy should be thinned to promote good turf growth.
- » Understand the variability in sun angles at different times of the year and how this affects turf health.
- » Conduct a shade audit to identify problem areas.
- » Conduct a tree survey that identifies each tree's location, species, health, life expectancy, safety concerns, value and special maintenance requirements.

CORPORATE SOCIAL RESPONSIBILITY

When Legacy Meets Heart

IPI TORO Service Team Gives Back at Ganesh Chaturthi

This Ganesh Chaturthi, the IPI TORO Maintenance team at Oxford Golf Resort, Pune, led by our Regional Service Manager Pradeep Kamble, demonstrated that true commitment goes far beyond the workplace. Without any company directive or fanfare, the team pooled their own resources and efforts to serve meals to 100 people, embodying the values of service, dedication, and community.

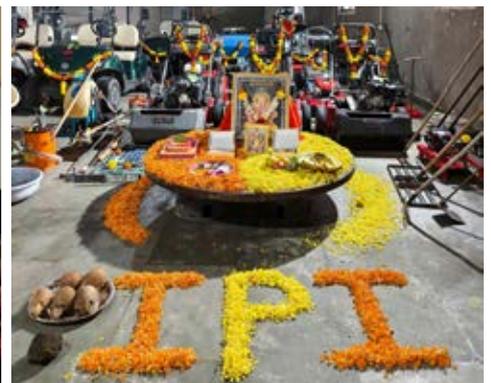

No fancy decorations, no planned recognition - just selfless action driven by heart and integrity. Every contribution, every

helping hand, reflected the spirit of giving that defines the TORO family.

It's moments like these that show what legacy really means: when a team works tirelessly to keep golf courses running at their best and still finds the time, energy, and resources to give back to the community.

We are proud of our TORO family for proving that the greatest celebrations come from selfless service, and that true excellence isn't just in the work we do - it's in the lives we touch.

"Every rupee contributed, every hand that helped - pure devotion in action."

Where Culture Comes Alive - Vasant Festival of Dance - Chennai

The Vasant Festival of Dance, presented every year by the Saraswathi Educational, Cultural and Charitable Trust, unfolded in Chennai as a profound celebration of devotion through art - where classical dance, spirituality and service found harmonious expression.

The Trust was founded in 1996 by **Dr. C. K. Garyali**, a respected retired IAS officer, and her mother, **Smt. Indra Garyali**, with a vision that brought together humanitarian responsibility, cultural preservation and India's ancient wisdom. At their request, **Shri Ravi Kumar Garyali** accepted the role of Managing Trustee for life, serving the institution with steadfast commitment until his passing on last December.

For over 22 years, the Trust's Vasant Utsav Dance Festival, held annually at the sacred Shri Kapali Temple, has reaffirmed the belief that classical dance is both a spiritual offering and a living heritage. The festival continues to honour eminent dance gurus and distinguished musicians, sustaining its place as a cornerstone of Chennai's cultural calendar.

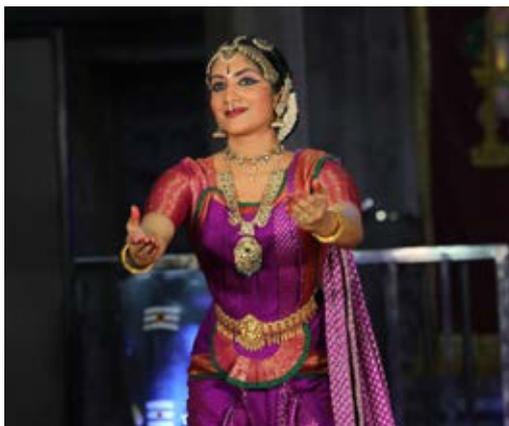

A philanthropist and cultural patron, Dr. C. K. Garyali has been instrumental in shaping the Trust's ethos - rooted

in education, inclusivity, and reverence for ancient Indian wisdom. This vision is carried forward by her daughter, **Ms. Priyadarshini Rajkumar**, whose active involvement reflects a seamless continuation of the Trust's founding values with contemporary relevance.

As a quiet remembrance, **Mrs. Vita Garyali**, wife of Late Shri Ravi Kumar Garyali, long associated with the festival's graphic and visual expression, will, from the 2026 edition onwards, be alongside the organisers - allowing her artistic sensibilities to quietly mingle with the kaleidoscopic colours, forms and rhythms of India's classical dance, in memory of her beloved husband.

Alongside its cultural initiatives, the Trust remains deeply engaged in education support, women's livelihood programmes, and sustained assistance to displaced Kashmiri Pandit families. In honour of Shri Ravi Kumar Garyali's life and service, the Ravi Kumar Garyali Endowment continues to strengthen scholarships and recognition initiatives aligned with the Trust's humanitarian mission.

More than an annual festival, the Vasant Festival of Dance stands as a living testament to leadership, remembrance, and devotion where culture truly comes alive.

Gold and Silver Glory: IPI's Young Stars Shine at Pune Martial Arts Championships

At the Pune District Martial Arts Championships, the next generation of IPI talent proved that dedication and discipline truly pay off. **Sawarli** and **Sanskriti**, daughters of our Regional Service Manager **Pradeep Kamble**, brought pride to the IPI family with their outstanding performances. Sawarli fought with remarkable skill to clinch the **Gold Medal**, while Sanskriti displayed tremendous grit to secure the **Silver Medal**.

These young champions embody the spirit of excellence that defines the IPI family - where talent is nurtured, determination is celebrated, and every achievement is a step toward greatness. Their success is a proud moment for the community, inspiring peers and reminding us all that the IPI spirit shines brightest in the young.

Gold and Silver for IPI's Rising Stars!

Sawarli and Sanskriti's victories at Pune highlight that talent, grit and the IPI ethos make champions - today on the mat, tomorrow in every arena they choose to pursue.

Together in Work, Service and Heart: Thirteen Years of Shared Purpose and Social Impact

The past months have been the most difficult of my life. The loss of my dear husband, Ravi Garyali, is a loss that words can never fully contain - personally and for all those whose lives he touched.

Ravi and I shared more than a marriage; we shared a mission. For thirteen beautiful years, we walked together not just in life, but in work, in service, and in purpose - driven by a common passion to make a meaningful difference in the lives of those who needed it most.

Our Shared Journey

What brought us even closer was our deep commitment to social causes that spoke to both our hearts. Together, we poured our energy, resources, and love into initiatives that became extensions of our shared values.

Smile's Garden, Kelambakkam became one of our most cherished projects. This school for deaf and underprivileged children became a second home to us. We didn't just provide support - we became part of their world. Together, Ravi and I worked to give these remarkable children better facilities, improved their kitchen and dining areas, and created engaging activities that sparked their curiosity and joy. Watching their faces light up, seeing them thrive despite their challenges, reminded us why this work mattered so deeply.

This initiative seamlessly integrated with “**A Street to Success,**” our program designed to provide quality education for children who desperately needed support but had limited access to it. Ravi believed that every child, regardless of circumstance, deserved a fighting chance at a better future.

Our journey of giving also took us to the pristine hills of Meghalaya, where we established another initiative at **Meghalaya School**. In that breathtaking setting, we brought moments of joy, learning, and hope to children who had so little yet gave us so much in return. Those trips to the hills, working side by side to impact young lives, remain among my most treasured memories with Ravi.

A Partnership in Work and Service

Ravi believed that leadership wasn’t about control, but about responsibility - not just in business, but in life. He led with quiet strength, deep integrity, and genuine care for people.

Whether in the boardroom or at Smile’s Garden, he brought the same values: trust, commitment, and an unwavering dedication to doing what is right.

These thirteen years taught me that a life lived together in work, in service, and in purpose is the most fulfilling life of all. We didn’t just build projects; we built hope. We didn’t just give resources; we gave our hearts.

Carrying Forward Our Shared Vision

As I navigate this difficult journey without him, I find strength in knowing that the seeds we planted together continue to grow. The children at Smile’s Garden, the students reached through “A Street to Success,” the young lives touched in Meghalaya - they all carry forward the legacy of our partnership.

Ravi’s absence is deeply felt, but his vision endures. And I am committed to ensuring that the work we began together—the causes we championed side by side - continues with the same love, dedication, and purpose that defined our thirteen years together.

Grief changes us, but it also brings clarity. What endures is love, purpose, and the lives we’ve touched together. These will remain my anchors as I move ahead - carrying forward not just his legacy, but our legacy.

With gratitude for every moment we shared and unwavering commitment to the journey ahead,

Vita Garyali
