Commitment and Continuity

Honouring a Legacy of Leadership

It is with a profound sense of responsibility that I as CEO of Irrigation Products International Pvt Ltd wish to convey our heartfelt gratitude to each and every Individual in our Indian Sports Field Industry including BCCI and State Cricket Associations who stood with us, while We continue to mourn the passing of our Managing Director, Late Shri Ravi garyali, He was a visionary leader and completely dedicated his life to Indian Sports Field Industry, built the foundation upon which we stand today. Late Shri Ravi Garyali was more than a leader, he was a mentor and a friend to many in this industry.

Our Unwavering Commitment to You

While the IPI Team navigates this period of transition, our primary focus remains the same: delivering the exceptional service and innovative solutions you expect from us. Ever since I took over as CEO on April 25, my priority has been ensuring our operations continue without disruption. We

have set a robust succession plan in place that ensures our core values and strategic goals remain unchanged.

I am pleased to share that I am guided by our company Chairman, **Mr. Kanwal Misri** who co-founded IPI(Pvt) Ltd. Successful Entrepreneur splits his time between the UK and India, driving the strategic vision and international partnerships that have built the company over the last three decades. The executive Team comprises of

Mr. Kanwal Misri, Chairman & Co-founder

Ms. Natasha Misri, Director

Mr. Pradeep Kundan Sadarangani, Director

Mr. Siva Kumar, Chief Executive Officer

Furthermore, I am fully assisted by our management committee - consisting of **Chief Operating Officer Mr. Ranga Babu**, **Chief Technical Officer Mr. Antony Samy**, and **Chief Financial Officer Mr. Selva Kumar** - to serve you with the same excellence you have come to expect.

Strength and Stability for Future

I have been associated with IPI Pvt. Ltd. and Indian Golf industry for more than 16 years now, working closely with Late Shri Ravi Garyali and other senior colleagues to shape our current trajectory. Our team is more united than ever, and we are committed to:

- **Operational Excellence** Maintaining the highest standards set by our Team in Association our principal Toro, providing world class products with latest Technology and continue the Industry's best After Market service support to our Golf Industry.

- **Strategic Growth** Advancing the long-term projects and partnerships already in motion.

- **Transparent Communication** Keeping you informed as we evolve and grow together.

Celebrating Recent Success

I am proud to share that, even during this difficult transition, our team has achieved the best run in new sales of Turf maintenance equipment and reached major milestones by completing the construction, renovation, and maintenance of projects such as the BCCI-COE, CSK-HPC, and the MA Chidambaram Stadium (Chepauk Ground).

The great support and trust our clients have placed in us has established us as the most preferred one-point solution provider for ground construction, renovation, maintenance, irrigation system installation services, and the supply and service of turf maintenance machineries for all sports fields. We have also expanded our support to cricket associations and ground owners by providing rental services for high-value equipment. This has turned out to be a great success for us while providing much-needed relief for customers facing budget constraints.

This achievement is a testament to the resilient foundation laid by **Late Shri Ravi Garyali** and the unwavering support of our shareholders, which now includes the two sons of **Late Shri Ravi Garyali**. Of course, this success is also due to our dedicated, award-winning, world-class service team of irrigation and turf maintenance equipment specialists.

A Partnership for the Future

We value the trust you have placed in IPI Pvt Ltd over the years. I look forward to connecting with many of you personally to listen to your feedback and discuss how we can continue to support your success.

Thank you for your continued partnership during this difficult time. Your trust is our most valued asset. As we look ahead, we are more committed than ever to delivering the world class products and Services. We are not just maintaining our momentum; we are accelerating it.

Best Regards

Siva Kumar

CEO, IPI Pvt Ltd

FROM THE EDITOR'S NOTES

Dear Valued Client and Friend of IPI,

It is with a full heart - one that holds both profound gratitude and deep, abiding grief - that I welcome you to this very special edition of the IPI Golf Magazine. As you turn these pages, you will find a glimpse of everything 2025 brought us: the milestones, the partnerships, the tournaments, the challenges and the moments on the fairway that remind us, again and again, why we love this game and this extraordinary community.

But 2025 also asked more of us than we ever anticipated. And so, before I speak of the year ahead, I must first speak of the man who made all of this possible.

In Loving Memory

In 2025, we lost our beloved Managing Director, Ravi Garyali - a man whose vision built IPI from the ground up, whose integrity set the standard for everything we do, and whose warmth made every person in this organisation - and far beyond it - feel genuinely seen and valued.

Because Ravi believed, above all else, in people. He believed that every role within a team deserves genuine respect - that no contribution is too small, no voice too quiet to matter. That was not a policy for him; it was how he lived. And it is the foundation upon which IPI will continue to stand. There for you, always since 1993.

About this magazine

This magazine, however, is equally the story of a remarkable woman without whom the IPI Golf Magazine - and indeed, the very first IPI Newsletter - would quite simply not exist.

Dr. CK Gariyali - beloved sister of Ravi, and one of the most extraordinary contributors - without whose support IPI would not have been what it is today - has been the editorial heart and soul of this publication from its inception. It was she who conceived and gave life to the very first IPI Newsletter, in January 2009, planting the seed from which this magazine grew season by season. Through every edition, every challenge - and every triumph - she brought her intellect, her dedication and her grace to these pages. Her contribution has never been limited to words alone - she has supported IPI in every respect, in every season, with the fullness of who she is.

It is no coincidence that Dr. CK Gariyali has been our **Guest of Honour** at every Awards Reception hosted by **TORO** - our Principal who we are immensely proud to represent across the Southern and Western Indian Subcontinent. That honour was never ceremonial. It was earned, and it was deserved.

The passage of editorial responsibility from her hands to mine is something I do not take lightly - that's why I took long time to implement - it is a privilege. I will spend every edition honouring and cherishing. I hope to carry forward the standards she set with the same love for this work that she has always so beautifully shown.

A New Beginning

As we step into 2026, as you go through the pages of this "year at a glimpse" you will know that the IPI team is **united, more than ever**. We are grieving, yes - but we are not broken. We carry Ravi's ethics, his values, and his unwavering commitment to excellence forward, together - with the same reciprocal respect for one another that he always insisted upon. That unity is his greatest gift to this organisation, and we intend to honour it in everything we do. Through the guidance of our Chairman, his greatest Friend, **Mr. Kanwal Misri**, and along with Ravi's sons, **Sameer and Kabir Garyali** and with **Mr. Pardeep Sadrangani** - the other shareholder of IPI, we all are here to serve our Clients, our Partners, our Friends, as usual, the IPI Way...

To each of you thank you for your continued trust in IPI. Your loyalty through this chapter has meant more than we can ever express. We do not take it lightly.

With warmth, gratitude and deep respect,

Vita Garyali

A VISIONARY LEADER

Ravi Garyali

A Life of Integrity and Connection: Remembering a Pioneer in the Golf Industry

The Indian golf community lost a towering figure on **5th December 2025** with the passing of **Mr. Ravi Garyali**, a leader whose legacy was built not only on achievement, but on people, purpose, and enduring relationships.

Ravi's professional journey was defined by a rare combination of vision and humility. After graduating with First-Class Honours in Agricultural Economics, he spent two decades in international finance before returning to India in the early 1990s. In 1993 he co-founded IPI with Mr. Ravinder Misri, laying the foundation for what would become one of India's most respected organisations in irrigation and turf management. Under his guidance, IPI grew into a team of more than 300 professionals, recognised repeatedly for excellence in service, innovation and partnership.

But Ravi's influence extended far beyond corporate success. He played a pivotal role in shaping industry standards and in advancing knowledge-sharing initiatives that strengthened the profession across India.

Colleagues and friends remember Ravi as a mentor and a

connector during the memorial organized by the family on 13th December 2025.

A Legacy Celebrated

The memorial on **13th December** brought together Clients, Colleagues, friends and family, who shared stories of Ravi's warmth, guidance and generosity. Among those remembering him were his wife Vita Garyali, his sons Sameer and Kabir Garyali, his sister Dr. CK Garyali, former IAS, and the entire IPI Team, reflecting the love and inspiration he fostered both at home and at work.

His partner, **Mr. Kanwal Misri**, rushed from the UK on 5th December and was with Ravi during his last moments, and also witnessed firsthand the deep connection and trust Ravi had nurtured over his lifetime.

Overcome with emotion, Kanwal Misri remarked:

"Ravi's greatest legacy was not just the company he built, but the people he inspired along the way."

The gathering captured the profound impact Ravi had on everyone around him - personally and professionally - showing that his legacy extends far beyond business achievements to the lives he touched and the relationships he nurtured. Ravi

Friends, family and the golf fraternity paying tribute to Ravi Garyali's enduring legacy.

was special: he was someone who listened with respect, encouraged with authenticity and opened doors for others to grow. His passion for education and empowerment was especially evident in his support for the curator seminar, where he championed the professional development of curators - positioning them as vital stewards of the cricket ground and essential contributors to the games future.

Beyond golf, Ravi's spirit of service extended into charitable work, including efforts to expand access to education for underserved communities.

Ravi believed deeply that cricket or football was not merely a game, but a platform for connection - where shared purpose and collaboration could elevate both the individual and the collective. His legacy lives on not only in the institutions he helped build, but in the values he embodied: integrity, curiosity and above all, genuine care for people.

As the industry moves forward, the lessons of his life - rooted in character as much as accomplishment - will continue to inspire the next generation of leaders, professionals and stewards of the game.

WHAT'S SPECIAL?

DISTRIBUTOR AND PARTNERS IN EXCELLENCE AWARDS

TORO.

Back-to-Back Excellence: IPI Honoured with the TORO Partners in Excellence Award

Achieving excellence once is an achievement. Sustaining it year after year is a statement. At the recent TORO Global event, IPI was once again honoured with the **TORO Partners in Excellence Award**, marking a back-to-back recognition that reinforces our long-standing commitment to quality, performance and partnership in the golf industry.

The award was presented during the TORO Global event, placing IPI among a select group of top-performing distributors worldwide. With approximately **150 TORO distributors operating in more than 90 countries outside the USA**, this recognition represents the highest level of achievement within TORO's global partner network. Each year, distributors compete against rigorous performance benchmarks, making back-to-back recognition a particularly meaningful accomplishment.

Toro Partners in Excellence Award is a prestigious distinction that underscores our continued commitment to exceptional customer service, strong sales performance, comprehensive after-sales support, and marketing excellence across both **machinery and irrigation solutions**.

Beyond performance metrics, the award reflects a shared philosophy between IPI and TORO - one grounded in technical expertise, reliability, and a deep understanding of the evolving

needs of modern golf courses. From delivering advanced turf solutions to supporting superintendents with consistent service and innovation, IPI continues to set benchmarks in golf course excellence.

Being recognised on a global stage is both an honour and a responsibility - one that motivates us to keep raising standards, together with TORO and our valued partners across the industry.

AntonySamy with the IPI family, celebrating 30 years of dedication and leadership.

30 Years of Dedication: Celebrating Antony Samy - A Milestone Worth Celebrating

This year, IPI proudly honours **Antony Samy**, our General Manager, as he completes 30 remarkable years of dedicated service to the organization. Over three decades, his commitment, leadership, and institutional wisdom have been instrumental not only in driving IPI's growth, but also in shaping the values, culture, and professional ethos that define the company today.

Reflecting on Antony's contribution, **Chairman Mr. Kanwal Misri** shared:

"Antony Samy's journey with IPI is a testament to loyalty, integrity, and quiet leadership. His consistency and sense of

responsibility have provided the organization with stability and strength through changing times."

Echoing this sentiment, **CEO Mr. Siva Kumar** noted:

"More than a General Manager, Antony has been a mentor, a guiding light, and made the strong foundation for IPI. His leadership has inspired generations within the organization."

Adding a personal perspective, **Mr. Rajeev Gupta, Branch Manager – Noida**, who has worked alongside Antony for over 20 years, remarked:

Antony guiding the next generation of leaders at IPI

“Working with Antony has been a privilege. His ability to lead with humility, support teams across regions, and remain deeply committed to IPI’s values has made a lasting impact on all of us.”

Leadership Beyond Titles

AntonySamy’s approach to leadership blends professionalism with humility. He leads with abnegation - the beautiful spirit of selfless dedication - always placing the team before himself. Through every challenge and every success, he has inspired those around him with his integrity, compassion and insight.

His influence extends far beyond organizational goals. Antony has mentored countless colleagues, guided teams through complex projects and helped foster a culture where collaboration, trust and respect thrive.

“30 years is more than a number - it’s a legacy of impact, mentorship and unwavering commitment.” says **RangaBabu, the COO of IPI.**

A Legacy of Dedication

Over three decades, Antony has helped make IPI not just a workplace, but a home. Every achievement, every milestone and every life he has touched reflects the depth of his commitment. His leadership has been both steady and inspiring, ensuring that IPI remains a company built on values as much as results.

“Your wisdom, compassion and leadership have shaped not just our success, but who we are as a family.” quoted Vita Garyali.

Thank You, AntonySamy

From all of us at IPI, we extend our heartfelt gratitude to Antony for 30 years of service, dedication, and inspiration. His legacy is reflected in the people he has guided, the teams he has built, and the culture he has nurtured. His influence will continue to inspire generations to come.

HIGHLIGHTS

Celebrating Our Winners

INDIAN WOMEN'S HOCKEY TEAM

Our warmest congratulations to entire Indian women's Hockey Team for the spectacular victory at the FIH Hockey Women's Nations Cup New Zealand 2025-26. Defeating the host nation 2-0 in the final to secure the title is a truly remarkable achievement that has made the entire country proud.

Winning this prestigious tournament for the second time speaks volumes about the incredible effort, discipline, and dedication each player has invested. Throughout the competition, the team demonstrated an unwavering determination to succeed, ultimately winning the championship in exceptional style. We look forward to your continued success on the international stage.

Congratulations once again on this well-deserved victory.

ICC MEN'S T20 WORLD CUP

Congratulations to the Indian Men's Cricket Team for winning the ICC Men's T20 World Cup on March 8, 2026, defeating New Zealand by 96 runs in the final at the Narendra Modi Stadium in Ahmedabad. This historic achievement by Team India has made the entire country proud. By securing this title, India has become the first nation to win consecutive T20 World Cups and the first to achieve this victory on home soil. Congratulation to Entire team members for their our standing performance.

INDIAN PREMIER LEAGUE (IPL) 2026

Congratulations to The Royal Challengers Bengaluru (RCB) which won the 2026 IPL title, defeating the Gujarat Titans by five wickets in the final on May 31, 2026. With this dominating performance and a win, RCB has now secured back-to-back championships. It is impressive to see them join the Mumbai Indians and Chennai Super Kings as the only teams in IPL history to successfully defend their title. It is truly a historic moment for the franchise and its supporters. Congratulations once again on this well-deserved victory!!

HIGHLIGHTS

RESTORING A LEGEND

IPI Transforms Chepauk Stadium for the World Stage

From historic cricketing ground to ICC World Cup-ready venue -

Irrigation Products International delivers a landmark renovation at MA Chidambaram Stadium, Chennai

Few cricket venues in the world carry the weight of history that MA Chidambaram Stadium - affectionately known as Chepauk - does. Home to the Chennai Super Kings, one of the IPL's most decorated franchises, this iconic Chennai arena has witnessed decades of cricketing drama, last-ball thrillers, and record-breaking performances. When the Tamil Nadu Cricket Association (TNCA) entrusted Irrigation Products International Pvt Ltd (IPI) with its renovation, the stakes were nothing short of monumental.

The result? A stadium reborn - and ready to host its first ICC World Cup match since renovation.

A TURNKEY TRANSFORMATION

Led by IPI CEO Mr. Siva Kumar and a dedicated project team,

the Chepauk renovation was executed on a full turnkey basis - encompassing every critical stage of outfield rehabilitation. From initial turfing and grow-in, through to final tournament preparation, IPI's experts managed the entire process in close coordination with the stadium curator and with the support of the BCCI.

At the heart of the project was a state-

of-the-art drainage system - widely praised by media coverage following the stadium's return to international cricket - paired with the installation of The Toro Company's automated sprinkler irrigation system. These two elements together ensure that Chepauk's playing surface meets the highest standards of modern cricket infrastructure, regardless of Chennai's challenging climatic conditions.

WORLD-CLASS TECHNOLOGY ON INDIAN SOIL

The deployment of Toro automated irrigation system is a testament to IPI's commitment to bringing cutting-edge solutions to Indian sport grounds. Precision-engineered for optimal water distribution and turf health, the system ensures consistent playing conditions - a critical factor at a venue that hosts both high-stakes IPL fixtures and marquee international encounters.

The drainage architecture, equally

impressive, has drawn particular attention from cricket observers and groundskeeping professionals alike - a reflection of the technical rigour IPI brought to every phase of the project

BUILDING ON A GROWING LEGACY

Chepauk is not IPI's first landmark - nor its last. Just prior to this project, IPI successfully completed the construction of a new cricket ground and pitches for the BCCI Centre of Excellence in Bengaluru, demonstrating the company's

growing capability to deliver world-class sports facilities at the highest level of Indian cricket.

Together, these two landmark projects cement IPI's position not merely as a supplier of TORO turf equipment and irrigation systems - including Toro, Ventrac, Mow Master, and Yamaha - but as a full-spectrum sports ground solutions partner capable of conceiving, constructing, and maintaining facilities that perform on the global stage.

A BENCHMARK FOR THE NATION

With the first ICC World Cup match played on the newly renovated outfield, Chepauk once again stands as a benchmark for cricket infrastructure in India. For IPI, the moment was both a validation and a milestone - proof that Indian expertise, international technology, and tireless teamwork can produce results the entire cricketing world takes notice of.

A MOMENT OF PRIDE:

INDEPENDENCE DAY AT CHEPAUK

Beyond the technical achievement,

the project carried a powerful emotional dimension for the IPI team.

During the execution phase, CEO Siva Kumar marked India's Independence Day at the iconic Chepauk Stadium alongside IPI's construction and agronomy teams. As the tricolour was hoisted within the historic arena, the moment symbolised more than national pride - it reflected the collective dedication of professionals working tirelessly to prepare the outfield for major tournaments scheduled through 2026.

For the workforce on site, it was a memorable affirmation that their expertise and commitment were contributing to a national sporting landmark.

"We proved to the industry that we not only supply world-class products - we produce and maintain world-class sports fields." **Mr. Siva Kumar, CEO, Irrigation Products International Pvt Ltd.**

BCCI CENTRE OF EXCELLENCE

BUILDING A FOUNDATION FOR CHAMPIONS

How IPI's turnkey expertise contributed into making the BCCI Centre of Excellence

The BCCI Centre of Excellence in Bengaluru - India's most advanced cricket training facility - represents a landmark moment for the sport in this country. Within this landmark project, IPI was entrusted with a scope that demanded the full breadth of its expertise: a turnkey delivery of turf infrastructure, irrigation, and grounds maintenance systems, executed to the exacting standards that a facility of this stature demands.

With more than three decades of experience in sports turf science and grounds management, IPI brought to the project something beyond technical capability - a deep understanding of what elite cricket surfaces require, and the integrated systems needed to sustain them

A TURNKEY SCOPE, DELIVERED END-TO-END

IPI's remit within the project was comprehensive. From precision pitch construction through to the

commissioning of a complete fleet of grounds maintenance machinery, every element of IPI's scope was delivered as a single, integrated solution - designed, supplied, and implemented to perform as one cohesive system.

At the heart of that scope was precision. The outfielders were laser-levelled to ensure true, consistent ball movement across the entire playing surface. A comprehensive drainage system was engineered beneath the ground to manage the demands of Bengaluru's climate, safeguarding surface integrity through heavy rainfall and rapid drying cycles alike. The pitches themselves were constructed with the meticulous attention to detail that international cricket demands - surfaces capable of producing the varied, competitive conditions that prepare academy players for the highest levels of the game

"Precision drainage, laser-levelled outfielders, BCCI-grade pitches - this is where champions are made, before they ever step onto the crease."

– Siva Kumar, IPI CEO

WORLD-CLASS EQUIPMENT AT EVERY STAGE

A premier training ground demands premier maintenance, and IPI has ensured the Centre of Excellence is equipped accordingly. An entire fleet of Toro Turf Equipment has been commissioned across the facility - machinery renowned internationally for the quality and consistency it delivers on elite sports surfaces. The fleet is supported by a carefully selected range of ancillary equipment: Super Sopper water management machines, Turfco top dressers, Mow Master cylinder mowers, and Anderson spreaders, all chosen to maintain the ground to international match standards year-round.

Complementing this, IPI has installed a state-of-the-art automated irrigation system across the outfields and practice

areas. Designed for precision water delivery, the system ensures that grass health and surface consistency are maintained with minimal manual intervention - a critical consideration for a facility that operates at intense year-round capacity.

TRUSTED PARTNERSHIP, LONG-TERM VISION

What distinguishes this project is not simply the technology deployed, but the collaborative spirit in which it was delivered. Over more than 30 years in the industry, IPI has developed a philosophy that goes beyond the transactional: the company views its role not as a supplier, but as a long-term custodian of the facilities it serves - bringing the same standards of care and precision to a world-class academy as it does to every ground in its portfolio.

That philosophy is visible throughout the Centre of Excellence. Every decision - from the specification of the irrigation network to the selection of maintenance machinery - was made with an eye not just on immediate performance, but on the long-term sustainability and playability of the surface. The infrastructure IPI has put in place is designed to serve Indian cricket for years to come.

"IPI didn't just build a ground - they built a foundation for our cricketing future." - Raju Purushotham, IPI Head of Service & Project Manager for NCA

WHERE INDIA'S FUTURE BEGINS

The BCCI Centre of Excellence is more than a training facility. It is a statement of intent - a signal that India is committed to investing in the infrastructure and environment that elite cricketing development demands. In partnering with IPI to bring this vision to life, the BCCI has ensured that the players who pass through its gates will benefit from conditions that are not merely adequate, but genuinely world-class.

For IPI, the Centre of Excellence represents a proud milestone in a long record of transformative projects. It is a demonstration that the three pillars on which the company has built its reputation - Build, Equip, Maintain - are as relevant at the very summit of Indian sport as they are anywhere else in the world.

IPI • BUILD • EQUIP • MAINTAIN

KERALA CRICKET ASSOCIATION AND IPI

A PARTNERSHIP THAT KEEPS DELIVERING

The latest deployment of Toro Stand- On Spreader Sprayer and ProCore 648s aerator at KCA's premier venues marks another chapter in a long and trusted collaboration with IPI.

The Kerala Cricket Association has been one of IPI's most valued and enduring partners. Over many years of close collaboration, the KCA has consistently demonstrated what it means to invest in professional turf management - embracing the best available technology, supporting the development of its grounds team, and maintaining an unwavering commitment to playing surface quality. That relationship has borne fruit time and again, and the latest developments at KCA's venues are a proud reflection of it.

At the Kerala Cricket Association ground in Thiruvananthapuram, the introduction of the Toro spreader-sprayer has brought a new level of precision to the ground's fertiliser and turf care programme. Designed for uniform, accurately calibrated application across the entire playing area, the machine addresses one of the most common challenges in tropical turf management: inconsistent grass growth driven by uneven nutrition. The results have been clear - healthier, more consistent turf, improved playability,

and a surface that lives up to the KCA ground's reputation for world-class standards.

"Healthier grass, improved playability, and world-class ground standards - the Toro spreader-sprayer has transformed how we care for our playing surface."

At **Greenfield International Stadium**, the recent delivery of the Toro ProCore 648s aeratoVr represents a significant step forward in the long-term management of the venue's playing surface.

Soil compaction - an inevitable consequence of intensive match use and Kerala's heavy monsoon rainfall - restricts drainage, limits root development, and gradually erodes surface quality. The Toro ProCore 648s tackles this directly, using high-frequency percussion aeration to relieve compaction at depth with minimal disruption to the surface. The outcome is improved drainage, stronger root systems, and a more resilient, durable playing field capable of meeting the demands of international cricket.

In keeping with the KCA's long-held belief that great equipment must be matched by great knowledge, a comprehensive hands-on training session was conducted for the Greenfield grounds team following the machine's delivery. Covering operation, calibration, programme selection and maintenance, the training ensures the KCA's trained operators can extract the full

potential of their new equipment - a hallmark of the approach that has made this partnership so productive over the years.

For IPI, the Kerala Cricket Association is far more than a client - it is a partner in the truest sense. The KCA's continued investment

in professional turf management technology, supported by IPI's expertise and product knowledge, stands as a model for cricket venues across India. As expectations for playing surface quality continue to rise, this long-standing collaboration ensures that Kerala's grounds remain at the forefront.

WANKHEDE STADIUM RAISES THE BAR WITH TORO TURF MACHINERY AND SUPER SOPPER WATER REMOVAL

IPI delivers a comprehensive ground equipment upgrade to one of India's most iconic cricket venues.

Wankhede Stadium in Mumbai has further strengthened its ground operations with the delivery and commissioning of two systems by IPI: TORO turf maintenance machinery and the Super Sopper Water Removal System. Together, they address the two most operationally critical aspects of managing a high-profile international venue - consistent surface quality and rapid weather recovery.

TORO TURF MACHINERY: PRECISION SURFACE MANAGEMENT

TORO's turf machines are engineered to deliver repeatable cutting performance across varying conditions. Consistent mowing height, reliable reel performance, and accurate ground-following capability are essential at a venue where pitch and outfield quality is scrutinised at the highest level. The machinery equips the Wankhede

ground team to maintain uniform surface firmness and sward density throughout a demanding fixture schedule. IPI's commissioning included full operator training, ensuring staff can operate the equipment to its full capability from day one.

"You're not just buying a machine - you're investing in a partnership built on 30 years of delivering excellence in sports field maintenance."

SUPER SOPPER: RAPID WATER RECOVERY

Mumbai's monsoon climate makes fast outfield recovery essential. The Super Sopper uses heavy-duty rollers and absorbent mechanisms to draw standing water from saturated turf far more efficiently than manual methods, enabling ground staff to restore match-ready conditions quickly. For a venue regularly hosting IPL fixtures and international matches, the system directly protects broadcast schedules, match timelines and spectator experience.

THE IPI ADVANTAGE

With over 30 years of experience across the Indian sports turf sector, IPI goes beyond equipment supply. Their service model encompasses

technical training, preventative maintenance, rapid parts availability, and on-site specialist support, on demand. The Wankhede installation is a clear example of how the

right technology, properly commissioned and supported, raises the standard of ground operations at the highest level of the game.

FROM DELIVERY TO MASTERY

RAISING THE BAR FOR CRICKET GROUND MANAGEMENT AT MCA BKC

*IPI - TORO completes commissioning and operator training at MCA BKC Cricket Ground
because Performance Starts With Knowledge*

IPI-TORO has successfully completed the commissioning of the TORO Greensmaster 3250 at MCA BKC Cricket Ground - a milestone that reflects not just the delivery of world-class equipment, but the company's unwavering commitment to empowering the people who use it.

PRECISION BUILT FOR ELITE CRICKET

The Greensmaster 3250 is engineered for the exacting standards

of professional turf management. Its floating cutting units and precise height-of-cut control allow ground staff to deliver the consistent, true surfaces that cricket demands - where every millimetre matters. At a venue like MCA BKC, that level of precision is non-negotiable.

TRAINING THAT MAKES THE DIFFERENCE

What sets IPI-TORO apart is what happens after delivery. The IPI Service Team conducted comprehensive, hands-on operator

training directly on-site - guiding ground staff through operation, routine maintenance, and safe handling practices. It was immersive, practical and purpose-built for the BKC ground's specific conditions.

"The right equipment delivers results only when backed by the right expertise."

A PARTNER SINCE 1993

For over three decades, IPI has built its reputation not just on supplying premium turf equipment, but on ensuring every ground crew has the knowledge and confidence to maximise it. The MCA BKC commissioning is the latest example of that philosophy in action - a seamless blend of technology, training, and long-term partnership.

BECAUSE AT IPI-TORO, DELIVERY IS JUST THE BEGINNING.

BUDGET FRIENDLY PITCH MOWERS FROM "MOWMASTER"

MowMaster pitch mowers provide a premium, tournament-quality cut at an affordable price point. They are the ideal choice for regional venues, universities, and recreational grounds that need professional results within a strict budget

Managing different grounds often requires dedicated mowing machinery. While budgetary constraints can sometimes make it difficult to allocate premium equipment, the quality of the cut remains a priority that cannot be compromised. To meet these needs and provide high-quality results at a

competitive value, IPI has partnered with MowMaster, an esteemed Australian company.

We have successfully supplied MowMaster SF 36 and MowMaster HC 26 mowers to numerous football and cricket grounds across India. These machines feature a wide range of height-of-cut (HOC) settings, making them ideal for both cricket outfields (8-10mm) and football pitches (25mm). The cut quality has been highly praised by the premium associations and clubs currently utilizing them.

Our MowMaster pitch mowers have become a significant success, particularly for venues looking for a balance of performance and budget. While many international venues continue to choose Toro for their primary pitch maintenance, MowMaster has become the favoured choice for district grounds under state associations, universities, colleges, and institutional recreational grounds. For instance, IPI is proud to have supplied a fleet consisting of Toro Time Cutters for outfield work alongside MowMaster pitch mowers to various district grounds within the Karnataka State Cricket Association.

NARENDRA MODI
STADIUM, AHMEDABAD

TRUST THE GENUINE. PROTECT THE PERFORMANCE.

Why genuine TORO parts are the only choice for elite sports venues

At venues like the Narendra Modi Stadium, where the world's eyes are watching, there is no room for compromise - on the pitch or under the hood. Every TORO machine working those iconic grounds deserves the same standard of care it delivers: genuine TORO Oil Filters, engineered specifically for your equipment.

"Genuine parts aren't just a recommendation - they're the difference between a machine that performs and one that fails when it matters most."

Designed to exact factory specifications, genuine TORO filters protect your engine from wear, maintain optimal oil flow, and extend the life of your investment. Every component is tested to perform in the demanding conditions of

professional sports turf management - so your machine keeps delivering, season after season.

Because the grounds that host history deserve equipment that's built to last.

Genuine Toro Parts. Trusted by Pros.

Because excellence doesn't cut corners.

TORO T7 POP-UP ROTOR - KHARGHAR FOOTBALL GROUND, MAHARASHTRA

IPI Project Feature • Design, Built & Maintained to International Standards

4" Pop-Up Height	40-360° Arc Range	Up to 18m Radius	Ahead of Deadline Delivery	IPI Built to Excel
----------------------------	-----------------------------	----------------------------	--------------------------------------	------------------------------

A great football pitch does not happen by chance. At Kharghar's Football Ground - Maharashtra's flagship **Centre of Excellence** - it happened by design, discipline, and the expertise of **IPI**.

Led by **COO Rangababu**, IPI's construction team delivered the football grounds **ahead of the project deadline** - without compromise on quality. From pitch profiling and drainage engineering to the installation of a precision irrigation network, every phase was executed to international standards. It was a blueprint for what Indian sports infrastructure can and should be.

"At IPI, a deadline is not a ceiling - it's a starting point."

- Rangababu, COO, IPI

THE TORO T7: ENGINEERED FOR EXCELLENCE

The Toro T7 Pop-Up Rotor was the natural choice for a facility of this calibre. Rugged by design, precise by nature, it delivers uniform coverage across every zone of the pitch - from penalty areas to wide flanks - through its adjustable 40°-360° arc and matched precipitation rate nozzles. Low-flow options reduce water consumption significantly, while integrated check valves eliminate

post-cycle seepage. The result: a consistently lush, firm, and playable surface that meets international football standards day after day.

MAINTAINED BY IPI - ALWAYS MATCH-READY

The IPI story at Kharghar doesn't end at handover. The dedicated IPI Maintenance Team continues to manage the facility, overseeing turf health, irrigation scheduling, and pitch performance - ensuring the Centre of Excellence remains exactly that: excellent. With the Toro T7 at the core of their maintenance programme, the team fine-tunes every cycle to match seasonal demands, pitch usage intensity, and climate conditions.

Built ahead of time. Maintained to world-class standards. This is what IPI delivers.

	TS170 Series	TS120 Series	690 Series	TS90 Series	T7 Series	640 Series
Max Radius	177 ft.	125 ft.	108 ft.	95 ft.	75 ft.	67 ft.

THE SQUAD OF CAPTAINS.

MATCH - READY EVERY TIME

IPI DELIVER TORO SMART IRRIGATION FOR SPORT FIELDS & GROUNDS

Under the leadership of COO Rangababu, the IPI team is transforming how sports facilities manage turf - delivering consistent, safe, and high-performance playing surfaces through TORO's smart irrigation technology.

A great match starts long before the first whistle. Beneath every safe tackle, every true bounce, and every sprint down the wing is a playing surface that has been carefully managed - and smart irrigation is the foundation that makes it possible. At IPI, we have made it our mission to bring that foundation to sports facilities of every scale, and our partnership with TORO Sport Fields & Grounds Irrigation gives us the technology to back it up.

THE IPI TEAM: WHERE EXPERTISE MEETS COMMITMENT

Under the leadership of **Late Shri Ravi Garyali, COO Rangababu** has built the IPI team around one core belief: sports ground managers deserve more than just a supplier

- they need a partner. "Every out field is different," he explains. "The soil profile, the usage intensity, the climate - all of these factors shape how an irrigation system should be designed and operated. Our team takes the time to understand each facility before we recommend a single solution."

From football, cricket outfields, and multi-use sports parks, Centre of excellence and sports academy, the IPI team has the experience to assess, design, install, and support TORO irrigation systems across a full range of sports ground environments. Our Senior Project Manager - Murali leads a hands-on team that stays engaged well beyond installation - ensuring systems are fine-tuned to deliver optimal results throughout

the season.

TORO SMART IRRIGATION: PRECISION FOR THE PITCH

TORO's sports ground irrigation systems are engineered for one purpose: uniform, reliable water

delivery across every square metre of a playing surface. Advanced rotary heads and pop-up sprinklers ensure consistent coverage, eliminating the dry patches and waterlogged areas that compromise both playability and player safety.

The real game-changer is TORO's smart central control platform. Facility managers can schedule, monitor, and adjust irrigation cycles remotely - responding in real time to rainfall, temperature changes, and seasonal demands. Whether preparing a pitch for a weekend fixture or recovering a surface after heavy use, the system puts precision control in the hands of the groundskeeper.

HEALTHIER TURF, LOWER WATER USE

Smart irrigation is not just about performance - it is about

responsibility. TORO's flow management and weather-based scheduling tools help sports facilities significantly reduce water consumption without sacrificing turf quality. For clubs and councils operating under tighter budgets and growing environmental scrutiny, this efficiency is not a luxury; it is a necessity.

The IPI team works with each client to

maximise these efficiencies - auditing existing systems, reprogramming schedules, and training grounds staff to make the most of every feature TORO's technology offers. The result is healthier turf, reduced running costs, and playing surfaces that are ready for action, week in, week out.

Contact IPI to find out how our expert team, led by COO Rangababu, can design and deliver the right TORO smart irrigation solution for your sports ground.

BUILDING TOMORROW'S CRICKET STAGE

IPI plays a pivotal role in bringing the Velammal Medical College cricket ground to life - a future home of IPL, TNPL by BCCI

Something significant is taking shape in Tamil Nadu. The upcoming cricket ground at Velammal Medical College Hospital & Research Institute is set to become one of India's most anticipated new venues - destined to host IPL, TNPL, under BCCI leadership, matches at the highest level. And at the heart of its construction is IPI, delivering the infrastructure that will define how this ground performs for decades to come.

WHAT IPI DELIVERED

Building a ground worthy of international cricket demands more than ambition - it demands the right systems, the right equipment, and the right expertise. IPI brought all three:

• SUB-SOIL DRAINAGE SYSTEM

A state-of-the-art drainage network engineered to ensure a perfect, playable surface in all weather conditions. No waterlogging. No delays. Just cricket.

• AUTOMATED TORO IRRIGATION SYSTEM

Precision irrigation technology that keeps the turf pristine and lush through every season, delivering the right amount of water to every corner of the ground, every time.

• TORO SPORT FIELDS & GROUNDS EQUIPMENT + TURFCO MAINTENANCE GEAR

Premium turf management equipment

to equip the ground team with the tools they need to maintain match-ready conditions year-round.

"Together, we are setting the stage for world-class cricket."

A VISION WORTH BUILDING

A special acknowledgement goes to the visionary Chairman of the Velammal Educational Trust, whose commitment to excellence made this project possible. Trusting IPI to deliver on a ground of this scale and significance speaks to a shared belief - that world-class cricket deserves a world-class stage.

The Velammal ground is more than a construction project. It is a statement - that India's cricketing infrastructure is growing and that IPI will be there, as it has been since 1993, to help build it.

STAY TUNED AS WE BRING THIS WORLD-CLASS VENUE TO LIFE.

IPI - Building the Future of Cricket Grounds Since 1993.

IPI Service Conference 2025 - Chennai Driven to SOLVE. Committed to EVOLVE.

Two days, one team, infinite drive – committed to solving, evolving and delivering excellence on the field.

The IPI Service Conference 2025 brought together our Service Engineers - that we call **"IPI Ambassadors"** - from **Pune, Mumbai, Goa, Hyderabad, Coimbatore, and Bangalore** for two days of learning, collaboration and inspiration in Chennai.

This intensive meet-up combined hands-on product updates, interactive training sessions, and team-building activities designed to

challenge both mind and spirit. It was a celebration of the expertise, energy, and commitment that our service team brings to the field every day.

Reflecting the spirit of IPI's tagline - **"Driven to SOLVE. Committed to EVOLVE."** - the conference strengthened collaboration across regions, reinforced knowledge sharing, and highlighted the innovative approaches that define IPI's service excellence.

With passion, professionalism, and a relentless drive to deliver smarter solutions, our service team continues to **raise the bar in supporting India's golf and turf industry.**

MATCH-READY: TURF MAINTENANCE TIPS

FROM THE INDIA'S TOP CRICKET GROUNDS

How elite venues use expert technique and professional equipment to keep their outfields in peak condition, every single game

Walk out onto the outfield at MA Chidambaram Stadium or BCCI-COE, and you will immediately sense the difference. The surface is flawless, firm underfoot, uniformly green, and cut to a precision that speaks of hours of painstaking care. These are not happy accidents. They are the result of disciplined, year-round maintenance programmes carried out by some of the most skilled groundskeepers in the world.

For grounds managers at every level of the game, the standards set by these elite venues represent the gold standard. Here, **IPI Sports Grounds breaks down seven key maintenance principles** that keep the world's top cricket outfields match-ready, every single game, and the professional equipment that makes it possible.

1. MOWING: SETTING THE STANDARD FROM THE FIRST CUT

At venues like the MA Chidambaram Stadium and BCCI-COE, mowing is

not simply a maintenance task. It is a statement of intent. The precision stripe patterns visible from the stands are the product of disciplined mowing routines, razor-sharp blades, and carefully varied cutting directions.

During the growing season, elite groundskeeping teams mow at least twice a week, targeting a grass height of 10 to 15 mm across the outfield. Mowing patterns are alternated every session to prevent soil compaction and promote uniform growth. Blade sharpness is treated as non-negotiable, as torn grass is an open invitation to fungal disease and surface inconsistency.

For outfield areas requiring exceptional cut quality and minimal surface impact, the Toro Greensmaster 3250 / 3150 or RM 3150 / 3575 deliver the productivity and precision needed to maintain large grounds to match-day standards. For more intensive outfield work, the Toro GR1021 combines manoeuvrability with a high-quality cut, making it well suited to the demands of a professional cricket pitches.

2. IRRIGATION: HOW INTERNATIONAL STANDARD GROUNDS KEEPS ITS OUTFIELD GREEN UNDER PRESSURE

Water management at the world's top grounds is a science in its own right. At

MA Chidambaram Stadium, BCCI-COE and GF Stadium, irrigation is governed by precision systems that deliver exactly the right amount of water, to exactly the right zones, at exactly the right time.

The principle is consistent: water deeply and infrequently, targeting 25 to 38 mm per week inclusive of rainfall. Early morning irrigation reduces evaporation and ensures the outfield surface dries before play, significantly lowering the risk of fungal disease. Deep watering drives roots downward, building the drought resilience that sustains outfield quality through intense playing schedules.

Working in combination with **Perrot field irrigation rotors and sprinklers**, configured to provide even, full-coverage distribution across the field of play, this is the kind of intelligent, responsive water management that elite venues demand. Regular system checks, pressure calibration, and zone-by-zone monitoring ensure that no area is over or under watered, protecting both surface quality and the long-term health of the grass profile beneath it.

3. FERTILISATION: FEEDING A WORLD-CLASS SURFACE

The lush, dense outfields of the MA Chidambaram Stadium and BCCI-COE,

do not happen by chance. Behind them is a carefully calibrated nutritional programme, driven by regular soil testing and precise seasonal application.

A balanced fertiliser programme forms the foundation, with the exact ratio determined by soil test results. Applications are timed during the growing season, typically spring and autumn, avoiding extreme heat or cold when grass cannot effectively absorb nutrients. Over-application is as damaging as neglect, burning the sward and contributing to environmental runoff.

For precise, large-scale fertiliser delivery across the outfield, the **Toro Multi Pro® 1750** fitted with accessories, controls and eliminate overlaps and deliver the spray products with accuracy which saves huge cost for the largest venues and most intensive schedules.

4. PEST AND WEED CONTROL: PROTECTING THE SURFACE UNDER PRESSURE

At the highest level of the game, a single weed or pest outbreak can compromise months of careful surface preparation. Elite venues operate proactive, integrated programmes rather than reactive ones, and the results speak for themselves in the quality and

consistency of their outfields.

Pre-emergent herbicides applied in early spring suppress weed germination before it begins. Targeted post-emergent treatments address any established weeds without widespread disruption to the sward. Curators at top venues monitor continuously for chafer grubs, mites, and burrowing rodents, all of which are capable of causing serious structural damage to the outfield profile if left unmanaged.

The **Toro Multi Pro® 1750** serves double duty here, transitioning seamlessly from fertiliser delivery to targeted pest and weed treatments with consistent application rates and precise nozzle control across the full outfield area. A healthy, well-maintained sward remains the strongest long-term defence, as dense grass leaves no space for weeds and is inherently more resilient to pest pressure.

5. AERATION: THE UNSEEN WORK BEHIND EVERY GREAT OUTFIELD

Some of the most important work carried out at venues like chepauk, Motera, BCCI-COE and Wankhede happens out of sight, deep in the soil profile. Aeration is the process that keeps the outfield breathing, relieving compaction caused by heavy foot traffic and repeated play, and restoring

the free movement of air, water, and nutrients to the root zone.

Elite venues aerate at least twice annually, typically in spring or autumn, with high-traffic areas receiving more frequent treatment. Core aeration, which physically removes small plugs of soil, is the method of choice at the top level, opening the profile far more effectively than spike aeration alone.

The **Toro ProCore® 648** is built for exactly this environment, delivering proven coring technology with the reliability and performance that professional sports grounds demand. Its versatility across different soil conditions and tine configurations makes it the go-to machine for outfield aeration at grounds where surface quality cannot be compromised.

6. TOP DRESSING: THE ART OF THE LEVEL SURFACE

Ask any curators what separates a good outfield from a great one, and top dressing will feature prominently in the answer. Applied consistently over time, top dressing levels the surface, improves drainage, enriches the soil

profile, and creates the uniformity that professional players and television cameras alike demand.

Top dressing should always follow aeration, filling the coring holes and improving the overall quality of the soil profile. A blend of sand, loam, and organic matter matched to the existing composition should be spread in a thin layer of approximately 6 mm across the outfield and worked in thoroughly with a lute or drag mat.

The Turfco Top Dresser delivers accurate, consistent spread patterns across large outfield areas, handling

everything from light dustings to heavy aeration hole filling with equal efficiency. For applications requiring greater precision or a wider range of materials, including sand and peat blends, the **EcoLawn Applicator** provides the flexibility and control that elite grounds teams need to match their materials precisely to surface conditions.

7. REPAIR AND RENOVATION: RESETTling FOR THE SEASON AHEAD

Name any fields of play in the world, the visibility of scars by the end of

a long season is unavoidable. Worn approach areas, scuff marks, and bare patches are an inevitable consequence of intensive play. What separates elite venues from the rest is the speed, thoroughness, and professionalism of their response.

During the season, worn outfield areas are turfed immediately with compatible grass varieties and surface damage is repaired promptly. Rest periods are scheduled deliberately between fixtures, as even short recovery windows meaningfully reduce cumulative surface stress.

End-of-season renovation is the true

reset. **The KORO Field TopMaker** is the machine of choice at the elite level, offering unrivalled versatility for removal of the turf renewal. The **Turfco Top Dresser** applies fresh dressing material with precision, and the **Toro Multi Pro® 1750** supports turfing and post-renovation treatment programmes. Together they give grounds teams everything needed to return even the most heavily used outfield to full match-ready condition for the season ahead.

The outfields of international venues, do not maintain themselves. They are the product of world-class

groundskeeping teams, disciplined year-round programmes, and professional-grade equipment from trusted partners including **Toro and IPI**, whose combined sports grounds range covers every stage of the maintenance calendar.

Whether you manage a Test match venue or a community ground with aspirations, **the principles are the same. Apply them consistently, invest in the right tools, and your outfield will be match-ready, every single game.**

IPI RENTALS

PROFESSIONAL TURF CARE, ON DEMAND

For more than three decades, IPI has been the trusted name behind some of India's finest sports facilities. From designing and constructing championship golf courses to maintaining premium sports grounds, the company has built its reputation on one simple principle: keeping playing surfaces at their absolute best.

Now, IPI is taking that same expertise and making it more accessible than ever with the launch of IPI Rentals - a professional turf care equipment rental service designed specifically for the demands of modern sports facility management.

The Right Equipment, Right When You Need It

Every groundskeeper knows that turf care isn't a year-round constant - it peaks. Tournaments place sudden, intensive demands on maintenance schedules. Seasonal transitions require specialist machinery that sits idle for

months if purchased outright. One-off renovation projects don't justify the capital expenditure of ownership.

IPI Rentals is built around these realities. Whether you're preparing a cricket outfield for a major fixture, renovating a golf fairway ahead of the season, or managing a football pitch through a gruelling winter schedule, the service puts professional-grade equipment at your disposal precisely when the workload demands it.

More Than Just a Machine

What sets IPI Rentals apart is the full-service model behind it. Clients don't simply receive equipment - they receive delivery, operational support, and the assurance of a company that has spent 30 years understanding what India's sports surfaces require.

That means no sourcing headaches, no logistics complications, and no uncertainty about whether the equipment will perform. When IPI

delivers a machine, it arrives backed by the institutional knowledge of a team that has built and maintained the country's finest facilities from the ground up.

A Smarter Approach to Grounds Management

For facility managers balancing tighter budgets and higher expectations, IPI Rentals offers a genuinely intelligent alternative to ownership. Capital is preserved, maintenance costs are eliminated, and access to the right tool for every job is guaranteed - without compromise.

In a sector where playing surface quality directly shapes the experience of athletes and spectators alike, having a reliable, expert partner on call is no small advantage.

IPI Rentals. What you need. When you need it.

For rental enquiries, contact IPI directly to discuss your facility's requirements.

ELEVATING EXCELLENCE

AT THE CHENNAI SUPER KINGS - HIGH PERFORMANCE CENTRE

From Vision to Victory: Building a Benchmark for High-Performance Cricket

When a franchise synonymous with excellence sets out to build a High Performance Centre, expectations are uncompromising. For IPI, being entrusted with the turnkey construction of the outfield at the **Chennai Super Kings High Performance Centre** was not just another project milestone - it was a responsibility to deliver a surface worthy of champions.

From the ceremonial Bhumi Pooja, marking the spiritual foundation of the project, to the first training sessions conducted on the completed turf, this journey reflects precision engineering, agronomic expertise, and meticulous execution.

Engineering Performance from the Ground Up

High-performance cricket demands more than aesthetics. It requires a scientifically constructed outfield that ensures:

- True ball roll and consistent pace
- Optimal shock absorption and player safety

- Efficient drainage and rapid recovery after rainfall
 - Uniform turf density and durability under intensive training loads
- IPI approached the project with a systems-driven methodology - integrating soil profiling, drainage architecture, laser grading, and precision turf establishment protocols.

Every layer beneath the surface was designed to support elite performance above it.

The result is an outfield that meets the rigorous training standards of a professional IPL franchise while maintaining long-term agronomic sustainability.

A Facility Designed for the Future of Cricket

The High Performance Centre is not merely a practice ground. It is an ecosystem for talent development - a platform where aspiring cricketers refine their skills under professional conditions

that replicate match environments.

By creating a tournament-grade training surface, the facility bridges the gap between grassroots development and elite competition. The consistency of the outfield enables players to train with match-realistic expectations - an essential factor in performance analytics and skill progression.

In a cricket-driven city like Chennai, this centre plays a pivotal role in strengthening the sporting infrastructure and nurturing the next generation of professionals.

Delivering Excellence, Corner to Corner

For IPI, the project underscores core competencies:

- Turnkey sports turf construction
- High-precision grading and drainage systems
- Advanced turf establishment techniques
- Long-term performance planning

Every square meter of the outfield reflects disciplined project management and technical execution - from subgrade preparation to final turf stabilization.

Today, seeing the ground operational and already contributing to high-level training validates the collaborative effort between stakeholders, engineers, agronomists, and the IPI execution team.

Setting a New Benchmark in Cricket Grounds

The Chennai Super Kings High Performance Centre stands as a testament to what is achievable when vision meets execution discipline. It is a facility built not just for today's champions, but for tomorrow's legends.

IPI is proud to have translated ambition into infrastructure - delivering a high-performance outfield that elevates training standards and reinforces Chennai's stature as a powerhouse of cricket.

In sport, greatness begins beneath the surface. And at this High Performance Centre, excellence truly starts from the ground up.

MULAPADU CRICKET GROUND B READY FOR INTERNATIONAL GLORY

Mulapadu Cricket Ground B is ready to host District, State, and International cricket - and Irrigation Products International (IPI) is proud to have delivered the upgrade that made it possible. Commissioned by the Andhra Cricket Association (ACA), this project transforms a regional ground into a venue fit for the highest levels of the game.

The Project

IPI's scope covered four critical phases of outfield construction, each essential to meeting international playing standards:

Grading and Levelling: An accurate, even outfield is the foundation of a safe and fair playing surface. IPI's levelling work eliminated uneven terrain and ensured consistent ball behaviour across the entire ground.

Subsoil Drainage System: In a region shaped by monsoon seasons, a reliable drainage system is non-negotiable. IPI designed and installed a purpose-built network to move excess water away quickly, keeping the ground playable and protecting the surface long-term.

Sand Layer: A precisely specified sand layer improves drainage, aeration, and grass root development. IPI supplied and spread sand to exacting standards, creating the optimal growing medium for the outfield turf.

Grassing, Growing & Maintenance:

IPI's team seeded and nurtured the outfield through its critical early growth phases, establishing the lush, even grass cover that players and spectators will now see at Mulapadu.

"From facing obstacles to overcoming challenges, the IPI team worked tirelessly - delivering precision and excellence at every stage."

A Partnership That Delivers

We are proud that the Andhra Cricket Association chose Irrigation Products International as their trusted partner to bring this vision to life. Their confidence in IPI's ethical approach and technical

expertise has resulted in a venue capable of hosting unforgettable cricketing moments - and put Mulapadu firmly on the cricketing map.

About Irrigation Products International (IPI)

IPI specialises in sports field construction including drainage systems, surface preparation, and turf management for cricket and other disciplines across India.

TRANSFORMING SPORTS GROUNDS

BUILDING BETTER SPACES FOR INDIAN COLLEGES AND INSTITUTIONS

The sports ground is more than just a patch of green – it's a critical space where students train, compete and grow into confident, disciplined individuals. Across India, however, many college sports grounds suffer from neglect, overuse and outdated infrastructure. That's where Sports Ground Renovation becomes essential – a strategic investment to revitalise these fields and bring them up to modern standards of performance, safety and aesthetics.

What is Sports Ground Renovation?

Sports Ground Renovation is the comprehensive process of upgrading worn-out, poorly maintained, or underperforming playing fields. It includes everything from surface regrading, drainage upgrades, and re-turfing, to the complete reconstruction of playing areas with high-performance materials.

At Irrigation Products International Pvt Ltd (IPI), we specialise in Sports Field Construction and Renovation for colleges, universities and sports academies across India – combining global technologies with local expertise to deliver best-in-class results.

Why Indian Colleges Need Sports Ground Renovation

In India's tropical and monsoonal climate, sports fields are exposed to extremes – heavy rains, high footfall and long dry spells. Without proper design and maintenance, these grounds can quickly become hazardous or unusable.

Common issues include:

- Uneven and compacted surfaces
- Poor drainage and waterlogging
- Patchy or dead turf
- Unsafe playing conditions

These challenges not only impact athlete performance but also increase the risk of injury – making renovation a crucial step in ensuring safe, high-quality sports environments.

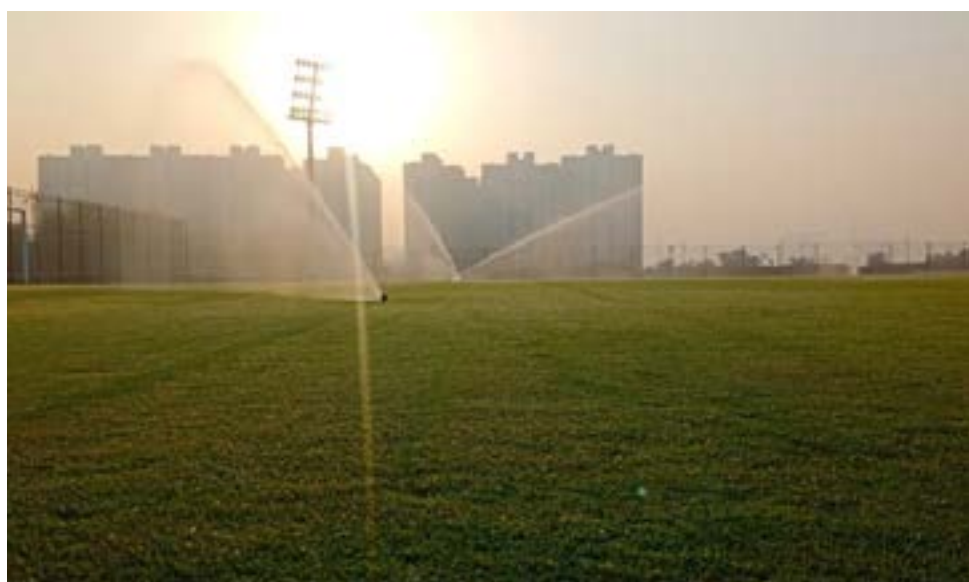

The IPI Approach: Renovation and Construction Tailored to Indian Conditions

1. Detailed Ground Audit

IPI starts with a scientific field assessment – examining soil profiles, drainage patterns, turf health, and usage requirements to identify renovation priorities.

2. Customised Design & Engineering

Each college ground serves unique sporting needs – football, cricket, hockey, athletics, or multipurpose use. Our team designs the field layout and selects the most appropriate surface and construction methods, based on:

- Budget
- Maintenance capabilities
- Sports requirements
- Regional climate

3. Renovation & Construction

Depending on the condition and goals, our services include:

- Grading for level playing fields
- Installation of sub-surface and surface drainage systems
- High-efficiency irrigation systems
- Natural or synthetic turf installation
- Soil amendment and turfgrass establishment

IPI ensures the use of premium materials, global best practices and quality workmanship throughout the process.

4. Post-Renovation Support

We also equip your team with ongoing maintenance protocols, irrigation schedules and periodic audits to ensure field sustainability and long-term performance.

Choosing the Right Partner

Why Choose IPI for Your Sports Ground Renovation

With over three decades of experience, IPI is a trusted partner for institutions across India, delivering world-class Sports Field Construction and renovation services. Our expertise extends across:

- Colleges and Universities
- Cricket and Football Academies
- Golf Courses and Stadiums
- Training Centres and Community Grounds

We are known for:

- Customised solutions for Indian soil and climate
- Smart irrigation and drainage integration
- Access to top-quality turf products and technologies
- A pan-India service network
- Uncompromising standards in sports turf safety and design

Benefits of Renovating Your College Sports Ground

- Safer playing conditions with level, cushioned surfaces
- Better athlete performance and injury prevention
- Enhanced reputation and aesthetics for the institution
- Lower maintenance costs with modern systems
- Support for hosting inter-collegiate and league events

Invest in the Future of Sport on Your Campus

Upgrading your sports ground isn't just about infrastructure – it's a statement of commitment to the physical development, health and success of your students. With **IPI's proven expertise in Sports Ground Renovation and Sports Field Construction**, you can create an environment where talent flourishes.

START *to* FINISH

CORPORATE SOCIAL RESPONSIBILITY

Where Culture Comes Alive - Vasant Festival of Dance - Chennai

The Vasant Festival of Dance, presented every year by the Saraswathi Educational, Cultural and Charitable Trust, unfolded in Chennai as a profound celebration of devotion through art - where classical dance, spirituality and service found harmonious expression.

The Trust was founded in 1996 by **Dr. C. K. Garyali**, a respected retired IAS officer, and her mother, **Smt. Indra Garyali**, with a vision that brought together humanitarian responsibility, cultural preservation and India's ancient wisdom. At their request, **Shri Ravi Kumar Garyali** accepted the role of Managing Trustee for life, serving the institution with steadfast commitment until his passing on last December.

For over 22 years, the Trust's Vasant Utsav Dance Festival, held annually at the sacred Shri Kapali Temple, has reaffirmed the belief that classical dance is both a spiritual offering and a living heritage. The festival continues to honour eminent dance gurus and distinguished musicians, sustaining its place as a cornerstone of Chennai's cultural calendar.

A philanthropist and cultural patron, **Dr. C. K. Garyali** has been instrumental in shaping the Trust's ethos - rooted in education, inclusivity, and reverence for ancient Indian wisdom. This vision is carried forward by her daughter, **Ms. Priyadarshini Rajkumar**, whose active involvement reflects a seamless continuation of the Trust's founding values with contemporary relevance.

Irrigation Products International Pvt Ltd founded by **Late. Shri. Ravi Garyali** has been the great supporter to the Saraswathi Educational, Cultural and Charitable Trust and will continue its support for promoting the rich Indian culture and art forms.

Alongside its cultural initiatives, the Trust remains deeply engaged in education support, women's livelihood programmes, and sustained assistance to displaced Kashmiri Pandit families. In honour of Shri Ravi Kumar Garyali's life and service, the Ravi Kumar Garyali Endowment continues to strengthen scholarships and recognition initiatives aligned with the Trust's humanitarian mission.

More than an annual festival, the Vasant Festival of Dance stands as a living testament to leadership, remembrance, and devotion where culture truly comes alive.

Road Safety Begins with YOU! A TRIBUTE INITIATIVE CARRIED FORWARD IN THE CHERISHED MEMORY OF

Late Shri Ravi Garyali, Managing Director, IPI

"Let's pledge to drive responsibly and make 2026 a safer year for everyone on the road!"

Your choices matter: be the change that saves lives.

National Road Safety Month - January 2026

January 2026 was observed as National Road Safety Month across India, a time to reflect on our collective responsibility as citizens, drivers, and communities. The theme resonated deeply with all of us at IPI - that road safety is not merely a regulation to be followed, but a moral commitment to protect every life that shares the road with us.

In the spirit of this national observance, IPI's efforts this January were especially meaningful. This road safety initiative holds a very special place in our hearts - it was a cause deeply cherished by our late Managing Director, **Shri Ravi Garyali**. His passion for community welfare and his unwavering belief that businesses must serve society beyond their commercial roles inspired this programme from its very inception. As we carry this work forward, we do so with profound gratitude and a firm resolve to honour his vision and legacy.

Free Eye Health Check-Up Camp for MTC Drivers

On Saturday, 25th January 2026, a landmark community health initiative was organized in Chennai. The Society for Prevention of Road Accidents (SPRA) and Irrigation Products International Pvt. Ltd. (IPI), in close collaboration with Radhatri Nethralaya and the Traffic Police, came together to host a free eye health check-up camp for the hardworking drivers of the Metropolitan Transport Corporation (MTC).

The logic behind this initiative is simple yet powerful: clear vision saves lives. Our MTC drivers navigate Chennai's bustling roads day after day, carrying millions of commuters

safely to their destinations. Ensuring that these dedicated professionals have healthy eyesight is not just a matter of personal welfare - it is a critical pillar of road safety for the entire city.

The camp drew enthusiastic participation and enabled drivers to receive professional eye check-ups at no cost, identifying vision concerns that might otherwise go undetected and unaddressed. It was a small yet enormously impactful step towards a safer road ecosystem.

Distinguished Leadership and Commendable Effort

A very special mention is owed to Dr. Archana Ramasundaram - a trailblazer and the first woman to hold the distinguished position of Additional Director in the Central Bureau of Investigation (CBI). Her inspirational leadership and steadfast support were instrumental in making this initiative a resounding success. Her commitment to public service beyond her institutional role sets an example for all of us.

Equally deserving of our warmest appreciation is Lalitha and the dedicated IPI team, who volunteered their time and energy with SPRA to bring this camp to life. Their commitment on the ground transformed a vision into reality and embodied the IPI spirit of giving back to the community.

In Loving Memory

This road safety programme will remain active and alive as a living tribute to our beloved late MD, Shri Ravi Garyali. His warmth, his vision, and his deep care for the communities around us will continue to guide every initiative we undertake. We at IPI are proud to keep his legacy burning bright - one act of service at a time.

The IPI Family

Drive Safe. Stay Alert. Protect Every Life.

As we move through 2026, let us each carry the pledge of National Road Safety Month in our hearts every single day. Drive with care, stay alert, and prioritize safety - for ourselves, for our families, and for every person who shares the road with us. Together, we can make a difference that truly matters.

Gold and Silver Glory: IPI's Young Stars Shine at Pune Martial Arts Championships

At the Pune District Martial Arts Championships, the next generation of IPI talent proved that dedication and discipline truly pay off. **Sawarli** and **Sanskriti**, daughters of our Regional Service Manager **Pradeep Kamble**, brought pride to the IPI family with their outstanding performances. Sawarli fought with remarkable skill to clinch the **Gold Medal**, while Sanskriti displayed tremendous grit to secure the **Silver Medal**.

These young champions embody the spirit of excellence that defines the IPI family - where talent is nurtured, determination is celebrated, and every achievement is a step toward greatness. Their success is a proud moment for the community, inspiring peers and reminding us all that the IPI spirit shines brightest in the young.

Gold and Silver for IPI's Rising Stars!

Sawarli and Sanskriti's victories at Pune highlight that talent, grit and the IPI ethos make champions - today on the mat, tomorrow in every arena they choose to pursue.
